

HPC, INC.

HPC, Inc. has been a cornerstone of the security industry since its inception in 1956. HPC is a family-owned and operated business as it has been from the very beginning.

The Hoffman family's ties to the locksmithing industry date back to Harold Hoffman running his locksmith shop in Chicago before World War II. When the war broke out, his staff was drafted and he was forced to reinvent his business. Harold started his distributing business at that time. His two sons both worked with him after their years in the service. As Harold's distribution business grew, his love of invention drew him to start manufacturing products as well. As the manufacturing end of the business gained strength, a separate business, HPC was born. Harold's older son, Al would use his strengths to run the distributing company and Harold's younger son, Jerry would follow his love of inventing and run the manufacturing business. Incorporated in 1956, HPC as both a designer and manufacturer of quality, revolutionary key machines, key cabinets, car openers, pick sets, software, books, door guards and tools, quickly became an industry leader. Jerry ran the company until 2003 when his youngest daughter, Francie took over and continues to run the company in the same tradition as her father.

HPC has always prided itself on producing industry-revolutionizing products. With a list of "firsts" to its name, as well as many U.S. Patents, HPC products are synonymous with innovation.

HPC was the first company to mass produce picks, the first to produce In-the-Door car openers, the first to produce Under & Over Style car openers, the first to produce a computerized code machine, the first to produce a touch-screen key machine, the first to produce software for the locksmithing industry, the only company to produce Keyable Key Cabinets & Safes...the list goes on and on.

Throughout HPC's over 55 year history the list of U.S. Patents awarded to HPC Products is tremendous. Some patented products have come and gone while many others stand the test of time. A few of HPC's most popular products that have earned U.S. Patents are:

- Blitz™ (1200CM)
- The Punch Machine™
- Switch Blitz™
- Clutch Tools
- Stamp Aligner™
- Graphite Gun
- Pocket Sized Decoder

HPC's product line is filled with ground-breaking products that will not only make your job easier, but make your business more profitable!

KEY MACHINES

The **Tiger SHARK™** features a new user-friendly design utilizing the time-tested components and engineering you have come to expect from the industry leader.

The on-board computer contains the complete code database of automotive, padlock and furniture keys. In addition there is an extensive database of lock manufacturers' depth and space specifications for commercial and residential direct digit keys. The database also includes a **comprehensive key blank cross-reference.** All of this data is easily accessed through the **intuitive touch screen**, and eliminates the need for an ancillary computer. The

The intuitive touch screen makes the Tiger SHARK™ simple to use from the first time you use it.

machine is updated annually to keep the data current. The design and construction of the machine makes cutting keys effortless. The **4-Way Jaws include the standard A and B sides, plus a top and bottom V jaw for holding**

The cutter pivots automatically to make high-security angle cuts on Medeco keys.

double-sided automotive keys. The wide-open carriage area, mirrored fascia and ergonomic Easy Grip Wing Nut make loading keys fast and easy. There are 5 different cutting options available, from the standard Plunge Cut for commercial and residential keys to the Smooth Cut for automotive keys, the Tiger SHARK™ cuts keys to

Unique reflective fascia makes key insertion fast, accurate and easy!

work in a wide variety of applications. The Main Screen lists 3 Presets for the keys you cut most frequently, making it **faster and easier to cut the popular keys.** The Decode Feature will read the depths of a cut

The 4-way jaws include the standard A and B jaws as well as Top and Bottom V jaws for holding double-sided automotive keys. Specialty jaws are also available for Best and Medeco® keys.

Cut the high-profit Tubular and Tibbe keys with the optional adapters.

KeyTrail® key management software. The Tiger SHARK™ is built to exacting standards to ensure many years of reliable service for independent and institutional locksmiths, in fixed locations and in mobile lock shops.

Put the power of a computer in your code cutting with the CodeMax[®] Machine. Based on the industry standard Blitz[™] Machine, the CodeMax[®], introduced more than 25 years ago, **is the original computerized code machine**. The CodeMax[®] has an internal computer chip that contains **Depth & Space Data (DSD) for more than 950 different**

lock types, plus a micrometer function in both inch and metric formats. This allows it to cut virtually all standard vehicle, commercial, residential and furniture keys throughout the world. All models of the CodeMax[®] are equipped with a shoulder gauge safety switch. This feature ensures the shoulder gauge is out of the way before you start cutting a key.

On the Automatic Angler model (No. 1200MAXAA), the cutter pivots automatically to cut high security angle keys, such as Medeco[®]. Simply enter the depth and direction of the angle and the CodeMax[®] AA does the rest.

The total power of the CodeMax[®] is realized when you connect it to your PC. All machines come with a 25-foot (7.5m) 9-pin serial cable for easy connection to your computer. With HPC Software, the CodeMax[®] Machine becomes **an integral part of your computer system**.

Some of the benefits you will realize are:

- **With CodeSource[®] code retrieval software, creating an original key is as simple as looking up the code on your computer and downloading it to your CodeMax[®].**
- **Downloading master key systems from MasterKing[®], insuring error-free key cutting.**
- **The ability to interrupt that master key job to cut another code key, and easily return to the master key system.**
- **Automatically keep track of new keys created when using KeyTrail[®] key management software. Please refer to the Software Section for complete information on all of our programs.**

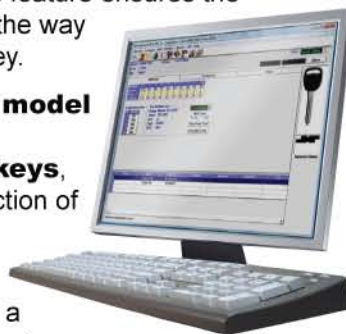

With optional equipment CodeMax[®] can cut:

- Assa V10/Twin[®]
- Emhart[®] Interlocking Pin
- Medeco[®] Biaxial[®], Commercial[®], KeyMark[®] and M³ Freedom
- Schlage Primus[®]
- Flat Steel Safe Deposit Keys and others

CodeMax[®] is a sound investment in your business and it will quickly become a vital part of your lock shop.

KEY MACHINES

Original Blitz™

HPC's Blitz™ is the unequivocal **"Standard of the Industry"** and has been since its inception in 1978 when it was originally introduced as the 1200CM. It revolutionized cutting keys with its innovative code card system. **By now tens of thousands of these machines have been sold around the world!**

The Blitz™ machine can cut virtually all standard pin and disc tumbler keys, as well as many specialty keys. The Blitz™ machine is **simple to use and very versatile**. In less than 30 seconds you can change from cutting a Ford 8-cut key to cutting a Medeco® Biaxial key. With optional adapters, this versatile machine will also cut 6-space and 8-space Tibbe keys found on some Ford and Jaguar vehicles, as well as 7-pin tubular keys.

To use the machine, simply insert the appropriate code card. **Use the "space" dial to move the carriage to the first space. Then move the "depth" dial to the proper depth for your first cut.** Continue this procedure until all the cuts are complete.

The Blitz™ is considered a **"must-have"** for any locksmith creating master key systems or doing code work.

The HPC Switch Blitz™ design is so incredibly unique that it was awarded a U.S. Patent. Now in the bench space of 1 machine you have 2 top-quality key machines: The Blitz™ Machine and a Semi-Automatic Duplicator.

The brilliant design and engineering makes the switch from code cutting to duplicating as simple as 1, 2, 3.

1. Slide the code bearing sleeve to the right.
2. Push in the locking pin to hold the depth crank in place.
3. Flip the depth crank toggle handle down to engage the spring-loaded duplicating plunger.

No tools are needed and no adjustments are required to the machine to switch from code cutting to duplicating, and back again.

The Switch Blitz™ has an exceptionally wide distance between the 2 jaws, making it perfect for duplicating extra-long automotive keys. In fact, it is the only machine that can duplicate some of the automotive keys with integral remotes.

The Switch Blitz™ is equipped with the latest features. It comes with the **unique Quick Nut on the cutter shaft that allows for changing cutters without**

using any tools. Simply hold onto the belt with one hand and turn the Quick Nut with the other hand to loosen and tighten the nut. Hand tightening the nut is sufficient to secure the cutter on the machine. The left-hand jaw is furnished with the **Easy Flip Shoulder**

Gauge handle. This handle makes it easy to raise and lower the shoulder gauge. It also has the **safety switch on the shoulder gauge**, which prevents the machine from powering on if the shoulder gauge is not all the way in the down position.

The motor on the Switch Blitz™ is a custom-designed, high performance model that provides ample torque for cutting. It is available in 120VAC or 240VAC for use in a shop, and with a combination 120VAC/12VDC motor when you want to use it in both your shop and vehicle.

The machine is **supplied with 150 code cards**, including many cards for the latest cars. Additional code cards and adapters are available separately with which various specialty keys can be cut by code, such as standard 7-pin tubular keys, 6- and 8-space Tibbe keys (used on some Ford and Jaguar cars), Medeco® keys, and safe deposit box keys. The Switch Blitz™ is truly 2 world-class key machines in 1.

If you need a machine for your van, or only have space for one machine or you are ready to buy your first key machine, the Switch Blitz™ is a great choice.

The Switch Blitz™ is supplied with 150 code cards.

Reduced Angle Automotive

No. PCH-1011

Small Cylinder for Most Autos

No. PCH-14

Standard Large Cylinder

The Punch Machine™ operates on the same principle as the Blitz™ machine. However, instead of an electric motor turning a cutting wheel, The Punch Machine™ uses a manually-operated lever to "punch" keys by code. This means no electricity is needed, so that you can bring your code machine to the job site. **It is completely portable and punches accurate keys by code quickly and effortlessly.**

The Punch Machine™ is all-inclusive. It comes with 104 code cards (including 4 micrometer cards) and 3 punch and die sets, making it ready to cut most commercial, residential, automotive and furniture keys right out of the box!

The design of some keyways (for example some Schlage Primus XP) is such that the side milling causes the blank to be exceptionally thin. The rotary milling cutter on other machines bends the blank, making it unusable. **Only The Punch Machine™ by HPC, with its precision punching process can effectively cut these keys.**

The Punch Machine™ is a must for those who need a portable machine to create original keys where electricity may not be available.

*This machine cuts Automotive,
Commercial and Residential Keys*

The **Trace-A-Key®** is a semi-automatic duplicator designed to be the fastest, most accurate and most dependable duplicator available. It is loaded with must-have features: The spring-loaded carriage assures consistent duplication, and the **expansive range allows for the cutting of longer automotive keys**.

It is equipped with a high-performance motor for trouble-free cutting. A Softie™ Brush, made with carbide-impregnated Tylon-X bristles, is included. The **double-angle tool steel cutter makes for fast and accurate duplicating**. An optional carbide cutter is available allowing for longer cutter life, particularly when using harder key blanks.

The double-sided jaws hold a wide variety of keys. The rugged single-casting construction makes it a solid and very durable machine.

The Trace-A-Key®, a high-performance duplicator, accurate through multiple generations, makes cutting a large quantity of keys an easy task.

KEY MACHINES

Industrial Grade Duplicators

Scan for more info!

The **HPC Speedex® Series** is a full line of Industrial Grade Duplicators ideal for a locksmith shop or service vehicle. These machines all come with **4-way jaws**, which allow them to cut a wide variety of different blanks, including double-sided keys (such as automotive keys).

The expansive carriage allows HPC Speedex® Duplicators to **accommodate large-bow and longer automotive keys**. Each machine in this line comes with an HPC Softie™ de-burring brush. The **durable construction and bronze bearings** combine for a long lasting machine.

Mini Speedex®

The **Mini Speedex®** is a **lightweight key duplicator** and is one of the most **accurate small key machines on the market**. Its size and weight make the Mini Speedex® convenient for stationary or portable use. The Mini Speedex® comes with a standard grade W1 steel single-angle cutter especially designed for its high rpm. The Mini Speedex® is available in 120VAC, 240VAC or 12VDC and takes up very little bench space.

Double Angle Conversion Kit

No. CW-51MC

No. CW-50MC

Cutter Wheel Only

When duplicating from depth keys, using a double-angle cutter allows you to accurately plunge-cut the new key. The double-angle cutter also decreases cutting time while increasing cutter life by allowing cuts to be made in both directions (bow-to-tip and tip-to-bow) when duplicating. The Speedex® **Double-Angle Cutter Kit** comes with all necessary parts, including the cutter, corresponding tracer and 2 washers, and fits all Speedex® machines.

Speedex® Slotter Cutters

No. CW-16KIT

No. CW-45SMS

The Premier and Power Speedex® have reversible tracers, so that you can **cut flat steel keys with the optional slotter cutter kit (No. CW-16KIT)** or the combination standard/flat steel slotter cutter (No. CW-45SMS).

Premier Speedex®

Includes all the Features
of Mini Speedex® Plus More.

The **Premier Speedex®** is a **dependable manual duplicator with a heavy-duty motor**. It is simple to use and makes easy work out of duplicating even a large number of keys. The Premier Speedex® is mounted on a sturdy base for extra stability.

**This machine can cut High-Security
Automotive Track Keys.**

Capture your piece of the highly profitable track key market. With the premium price charged for these keys, the **affordable price** of the Big Groove™ makes it an excellent investment in your business.

The HPC **Big Groove™** is new from the ground up. It incorporates American precision CNC machining with over 55 years of HPC Key Cutting expertise!

This supremely accurate, heavy-duty track key duplicator will set a **new standard of excellence** in track key duplication!

Big Groove™ cuts the most popular 2-track and 4-track keys (internal and external) without additional adapters. Plus, it cuts many luxury and specialty keys! **Its unique swing-away head allows for easy key loading and with its easy-glide carriage it cuts perfectly accurate keys effortlessly.**

Once found only on a few luxury cars such as Mercedes and BMW, track keys (also known as laser or sidwinder keys) are now used on many models from nearly all of the auto manufacturers, including Chrysler, Ford, GM, Honda, Hyundai, Toyota and VW.

The super smooth X-Y table is operated with both hands to provide total "hands-on" control of the key cutting, and also solves the problem of single-handed skewing found on other machines.

Duplicating these keys is highly profitable. The new Big Groove™ makes it easy and affordable to get into this lucrative market.

The precision engineering and manufacturing put into this heavy-duty duplicator ensure generations of accurate keys.

Mini Groove™

The HPC Mini Groove™ is a totally portable, extremely affordable high-security automotive key duplicator designed for the locksmith on the go! It can be powered in two ways, either by the rechargeable internal 12 volt DC battery or from your vehicle battery.

Its flexibility and compact size make the Mini Groove™ a completely portable key machine that can be left in the shop, mounted in your van or carried with you to the job. Once charged, the internal battery and 1800rpm motor supply enough power to cut more keys than you would need in an average day.

With the 3-flute 3/32" (2.5mm) end mill cutter and versatile jaws on the Mini Groove™, you will be able to accurately duplicate virtually all 2-track and 4-track, internal and external keys. The single-size cutter design allows you to cut narrow tracks and the fluid XY-platform allows you to widen cuts for large tracks.

The jaws are designed to elevate and securely grip virtually any standard track key. This feature gives you ample space on the blank edges for cutting external tracks without worrying about jaw or cutter damage.

The Mini Groove™ jaws also have multiple slots for tip gauging different length keys and each jaw is equipped with a Key Retaining Plate to help secure difficult to hold keys. The Mini Groove™ comes with a light to illuminate the cutting area when working in poorly lit places. Under normal use, the only adjustment that you will make is raising and lowering the cutter and tracer into position by turning the knob on top of the machine.

The Mini Groove™ is one of the easiest machines to use and cutting high-margin track keys, you will quickly re-coup your investment.

This machine can cut High-Security Automotive Track Keys.

KEY MACHINES

The Best Name in Tubular Key Cutting

Scan for more info!

The tubular lock was invented in 1934, and was developed specifically as a high security alternative to the common commercial lock cylinder. Today, tubular locks are found virtually everywhere, from alarm switches to vending machines, from cam locks to motorcycle ignitions. Tubular locks continue to be an essential part of the security picture as a whole. **For a locksmith to be successful in today's market they must be able to produce all types of keys for their customers, including tubular keys.**

Tubular Duplicode™

1

Tubular Duplicode™
No. 747XU
No. 747XU240V (240 volt)

The **HPC/Scotsman Tubular Duplicode™** is the preeminent tubular key machine. **It will cut most of the popular sizes of tubular keys by code**, including 7-pin standard, oversized and small bore. It accommodates 8-, 10-, & 11-cuts, right & left-hand cuts, dead-pin cuts and pin-within-a-pin cuts. It also can **duplicate a wide variety of keys with**

any space and depth configuration, as well as duplicate a key from an HPC Tubular Pick. The Tubular Duplicode™ is equipped with a carbide cutter for smooth cutting and a plexiglas shield for added safety. This is an **extremely versatile machine** that will handle virtually all tubular code cutting and duplicating.

This machine can cut most popular size Tubular Keys.

Code-cut Tubular Keys on your HPC Blitz™, Switch Blitz™ or Tiger SHARK™ machine with the Tubular Key Adapter.

Automotive Super Jaw Kit

Automotive Super Jaw Kit No. ASJ-1200

The car manufacturers make their keys double-sided for the convenience of their customers. HPC made the **Automotive Super Jaw** for the convenience of our customers. It allows you to **accurately cut double-sided automotive keys on your Blitz™ and Switch Blitz™ Machines** (without the time-consuming use of shims or wires that can be easily lost or misplaced). The kit **includes 20 code cards** covering the most recent vehicles and designed exclusively for use with the Automotive Super Jaw.

* These cutters are not supplied with the Blitz™ or Switch Blitz™ Machines

Specialty Jaws and Adapter Kits

Kaba Peaks Jaw

With this Jaw you are able to cut Kaba Peaks keys on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines.

No. KPJ-1

For Blitz™, Switch Blitz™ and CodeMax®

Medeco® Jaw

With this Jaw you are able to cut Medeco® Level 1 Commercial keys. This jaw is for use on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines.

No. MJ-1

For Blitz™, Switch Blitz™ and CodeMax®

Medeco® KeyMark® Jaws and Kit

With these different Jaws you are able to cut Medeco® KeyMark® keys on your Blitz™, Switch Blitz™, CodeMax® and Tiger SHARK™ Machines.

No. MJ-2S

For Tiger SHARK™ (top and bottom jaw)

No. MKYM-KIT

For Blitz™ and Switch Blitz™ (jaw, insert, card, and tip stop)

No. MJ-2

For Blitz™ and Switch Blitz™ (jaw and insert only)

No. MJ-2MAX

For CodeMax® (jaw, insert, and tip stop)

Medeco® 3 Freedom Jaws

With the **No. MJ-3** Jaw you are able to cut Medeco® 3 Freedom keys on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines.

With the **No. MJ-3S** Jaws you are able to cut Medeco® 3 Freedom keys on Tiger SHARK™ Key Machines.

No. MJ-3

For Blitz™, Switch Blitz™ and CodeMax®

No. MJ-3S

For Tiger SHARK™ (top and bottom jaw)

Schlage Primus®/Quad Jaw

With this Jaw you are able to cut Schlage® high security Primus® keys and Quad Series, as well as Schlage® standard keys. This jaw is for use on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines.

No. SPJ-1

For Blitz™, Switch Blitz™ and CodeMax®

Best Jaw

With these Jaws you are able to cut Best keys on Tiger SHARK™ Key Machines.

No. BEST-1S

For Tiger SHARK™ (top and bottom jaw)

GM 10-Cut/Ford 8-Cut Jaw

This Jaw will allow you to cut GM 10-Cut and Ford 8-Cut keys on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines.

No. GMFJ-1

For Blitz™, Switch Blitz™ and CodeMax®

Speedex® Code Adapter Kit

No. SCA-9100

For Mini Speedex®
and Premier Speedex®

Scan for more info!

HPC's Speedex® Code Adapter Kit turns your duplicator into a code cutting machine! It works on all Mini Speedex® and Premier Speedex® Machines. It's faster to cut a key to a cylinder than to pin a cylinder to a key! Perform an easy one-time installation and have two machines in the same space as one. The adapter locks out of the way when duplicating and holds .500" size plugs. **HPC's Speedex® Code Adapter Kit is the least expensive way for you to start code cutting!**

No. CW-24MC

Cutter for Speedex® Code Adapter Kit

Tibbe Key Adapter Kit

No. TIBBE-CMB

For Blitz™ (pictured)

No. TIBBE-SWITCH

For Switch Blitz™

No. TIBBE-SHARK

For Tiger SHARK™

With the Tibbe Key Adapter Kit you can cut both 6-space and 8-space Tibbe keys on your Blitz™, Switch Blitz™ or Tiger SHARK™ machine. These specialty keys are used on some Ford and Jaguar cars. Fast, easy, accurate and economical, this adapter will be a valuable addition to your cutting equipment. The Tibbe Key Adapter Kit comes with everything you need to cut these high-profit keys, including the adapter, slotter cutter, 2 Allen wrenches and a code card (for all Blitz™ and Switch Blitz™ Series Key Machines).

No. CW-95

Cutter for Tibbe Adapter Kits

Tubular Key Adapter Kit

No. TKA-CMB

For Blitz™ (pictured)

No. TKA-SWITCH

For Switch Blitz™

No. TKA-SHARK

For Tiger SHARK™

With the Tubular Key Adapter Kit you can convert your Blitz™, Switch Blitz™ or Tiger SHARK™ into a tubular key code machine. It is factory preset to cut standard 7-pin tubular keys (.375 O.D.) by code. The Tubular Key Adapter **fits in the standard jaw making conversion quick and easy.** The kit comes with an adapter, carbide slotter cutter, a code card (with the Blitz™ and Switch Blitz™ models) and an Allen wrench. Plus, with the included Tubular Key Decoder, you can **quickly decode existing tubular keys and make new factory originals by code.** Fast, easy, accurate and economical, the Tubular Key Adapter Kit is a valuable addition to your cutting equipment.

No. CW-128C

Cutter for Tubular Adapter Kits

Gauges & Accessories

Tip Stops

No. CM-1054MA

Standard replacement tip stop for Blitz™, Switch Blitz™, CodeMax® and Trace-A-Key® Series Key Machines

No. RT-SD

For use with safe deposit keys on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines

No. CM-1054R

For use with 7-pin Best and 10-cut Ford on Blitz™, Switch Blitz™, CodeMax® and Trace-A-Key® Series Key Machines

No. HT-SD

For use with safe deposit keys on Blitz™, Switch Blitz™, and CodeMax® Series Key Machines

No. HT-625

For use with L&F safe deposit box keys on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines

No. HT-125

For use with L&F safe deposit box keys on Blitz™, Switch Blitz™ and CodeMax® Series Key Machines

Gauges for 4-Way Jaws

**Standard
Tip Gauge
No. ST-4**

The **Standard Tip Gauge** allows you to tip gauge keys from any side of HPC's 4-way jaws. For use on Speedex®, Trace-A-Key® and Automate™ Series Key Machines (with 4-way jaws). Set of 2.

**Best/Short
Tip Gauge
No. BT-4**

The **Best/Short Tip Gauge** allows you to tip gauge Best/Short keys from any side of HPC's 4-way jaws. For use on Speedex®, Trace-A-Key® and Automate™ Series Key Machines (with 4-way jaws). Set of 2.

Key Shims

**Brass Plated
Key Shim
No. KBPS-1**

This **Brass Plated Key Shim** (on chain) helps prevent hard to hold keys from tilting. For use with Blitz™, Switch Blitz™ and CodeMax® Series Key Machines.

**Ford Double
Sided Block
No. FB-1**

Ford Double-Sided Block set consists of 2 blocks for holding Ford double-sided keys when duplicating.

Calibration

The **Blitz™ Calibration Kit** is an easy to use tool kit for use with Blitz™ and Switch Blitz™ Series Key Machines. It is designed to quickly and accurately diagnose whether your machine is out of calibration. If it is out of calibration, the kit can then be used to calibrate your machine with just a few simple steps, or determine whether factory service is needed. This kit makes it easy to calibrate your machine and helps to eliminate unnecessary downtime.

**Blitz™
Calibration Kit**
No. CMB-CK

Connections

The **Software Cable** is a 25-foot (7.5m) long 9-pin serial cable that connects your CodeMax® or Tiger SHARK™ to your PC. It allows for downloading bittings from HPC software, including CodeSource®, MasterKing® and KeyTrail®.

Software Cable
No. CABLE-25S

Time Savers

The **Quick Nut** twists on and off by hand so that there is no need for any tools when changing cutters. The Quick Nut is designed for use with Blitz™, Switch Blitz™, CodeMax® and Tiger SHARK™ Series Key Machines.

Quick Nut
No. QN-100B

You raise and lower the shoulder gauge on your machine many times each day. The **Easy Flip** Handle attaches to the shoulder gauge on all Blitz™, Switch Blitz™, and CodeMax® machines providing a sturdy handle to manipulate the shoulder gauge. It comes complete with 2 sets screws and an Allen wrench for easy installation.

Easy Flip
No. EFLIP-1200

Wing Nuts & Washers

The **Standard Wing Nut** is made of virtually indestructible plastic. It is included on the Speedex® duplicators and also fits all other HPC Key Machines.

Standard Wing Nut
No. SNK-3

The **Easy Grip Wing Nut** is made of polished steel for a great look and is ergonomically designed to make loading keys easier. It is included on the Tiger SHARK™, CodeMax®, Blitz™, Switch Blitz™, The Punch Machine™, Trace-A-Key® and Automate™. It also fits all Speedex® machines.

Easy Grip Wing Nut
No. EGN-1

The **Thrust Bearing Washers** help prevent over tightening of the wing nuts. Sold in sets of 2.

Thrust Bearing Washer Set
No. BBW-2

Transport

This soft-sided, rugged **Carrying Case** has a heavy-duty plywood base. The cushioned handles make it comfortable to carry. It will hold the Blitz™, Switch Blitz™, The Punch Machine™, Trace-A-Key®, Automate™ or Mini Groove™.

Carrying Case
No. 1200 CASE

Gauges & Accessories

Organization

Storage Panel No. CARD-BP

Holds 40 code cards conveniently.
Cards sold separately.

Instruction Manual Set

No. CARD-B
for Blitz™ Series

No. CARD-SB

for Switch Blitz™ Series
Includes Manual, Storage Panels
for 150 cards and binder.

Softie™ Brush

Softie™ Brush and Assembly

No. 12SB

Softie™ Brush
Assembly

No. TYX-3

Softie™ Brush Only

It is important to de-burr newly cut keys to prevent obstructions in the lock. The **Softie™ Brush** is the only key machine brush made of Tylon-X (a unique space-age polymer). The carbide-impregnated material de-burrs faster and smoother, and **lasts 6 times longer than a wire brush**. The Softie™ Brush comes standard on the Tiger SHARK™, Blitz™, Switch Blitz™, Trace-A-Key® and all Speedex® machines. The Softie™ Brush Kit includes the brush, shield, pulley and installation hardware to add the Softie™ brush to standard models of the CodeMax®, 1200CM and older models of the Trace-A-Key® machines.

Blitz™ Shoulder Gauge Safety Switch

Blitz™ Shoulder Gauge Safety Switch

No. 1200C-SGS

For 120VAC Machines

No. 1200C-SGS240V

For 240VAC Machines

The **Blitz™ Shoulder Gauge Safety Switch** is designed to protect the shoulder gauge from being accidentally damaged by the cutter. It prevents the cutter from spinning if the shoulder gauge is not positioned all the way down. When the Shoulder Gauge Safety Switch is not in its rest position turning on the machine will result in the safety switch relay disengaging the cutter motor's power. This will also happen if the gauge is moved from its rest position while the cutter motor is already on. This safety switch can easily be added to any 1200CM or Blitz™ machine manufactured from 1980 to 2004 (at which time it became standard equipment).

12-Volt Key Machine Conversion Kit

12-Volt Key Machine Conversion Kit No. DC-12

12-Volt DC Motor Only

(Replacement motor for AC/DC equipped
key machines.)

No. DC-MOTOR

The **12-Volt Key Machine Conversion Kit** allows for HPC's 9160MC and 9180MC Speedex® machines to be converted to 12VDC. By using the DC-12 kit you can operate your AC-powered duplicator in your van without the use of expensive inverters. It includes an in-line fuse for protection and a cigarette lighter adapter for plug-in convenience. The kit also includes: motor, frame, pulley, belt, 10 feet (3 meters) of 14-gauge wire, double-pole single-throw toggle switch.

Motor:	12VDC
Power:	40 oz.-inch torque rating, 3000 rpm with load 1/6 hp / 12 amps
Cutter RPM:	1000 rpm (by use of the pulley included)
Shaft:	3/8" (9.5mm) diameter, rotates within ball bearings
Frame:	Standard NEMA 48 configuration
For use with:	9160MC and 9180MC Speedex®

The Quick and Easy Way to Master Key

MasterKing® (contains 2 CDs)
No. MK-CD

also available separately:
How to Create Master Key Systems
No. HT-CMK1

Providing master keyed systems is an essential part of servicing the highly profitable commercial, industrial and institutional customers in your market.

Before you can offer master key systems, you need to understand the fundamentals of master keying.

HPC's program **How to Create Master Key Systems for the Security Specialist** will teach you everything you need to know. **Using detailed animation, colorful illustrations and audio**, this program clearly and concisely explains how to select key bittings, pin cylinders, create Total Position Progression Systems, Rotating Constant Systems, Page Systems and much more.

Creating a master key system on paper is a time-consuming process, and costly mistakes are easy to make. Once you understand the principles of master keying, you can **let the computer do the work** quickly and error-free. HPC's **MasterKing®** program creates superior master key systems faster than ever. **MasterKing® will guide you through the development of simple or complex master key systems step by step**, eliminating the possibility of transposed numbers, duplicated bittings and uncuttable keys.

MasterKing® and the included How To Create Master Key Systems software provide all the information and resources for you to become a master keying specialist.

List Systems

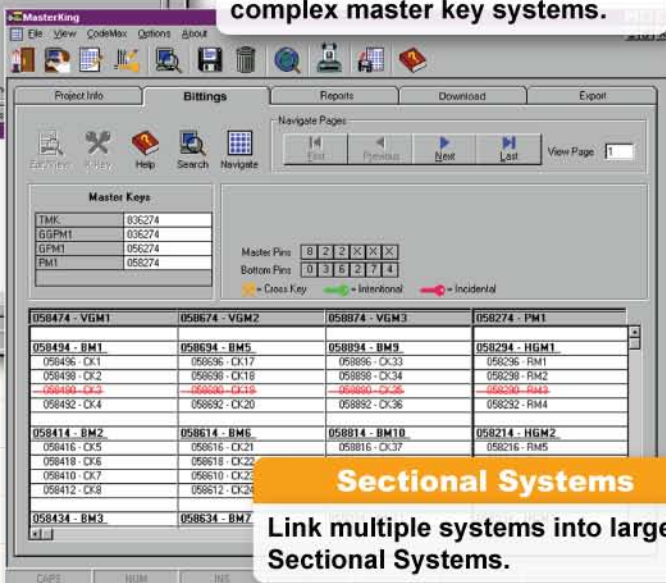

See up to 5 levels of bittings in the familiar, easy-to-navigate List Format.

Scan for more info!

Page Systems

The Page Format provides greater flexibility and allows creation of complex master key systems.

Sectional Systems

Link multiple systems into larger Sectional Systems.

Complete

Over 220 lock types from over 50 manufacturers or add your own information.

Informative

Indicates card, cutter and jaw for the HPC Blitz™ and The Punch Machine™.

Extra Info

Key blank cross-reference

No Guessing

Check how many bittings will be available before finishing your system.

All-Inclusive

Indicates the lock manufacturer's specifications for master keying, adjustable as needed to fit your requirements.

Easy-to-Use

Accept the defaults for the fastest and largest system. Or, modify it to fit your requirements.

Comprehensive

Creates master key systems in 2 formats, plus accommodates sectional systems and allows manual entry of existing systems.

Adaptable

Modify every aspect of your master key system, including chamber progression and biting array.

Flexible

Create systems from simple 1-level "Single Keyed-Different", to complex 7-level master keyed systems.

Support

Knowledgeable and Friendly USA Factory Technical Support

Basic Features:

- Multi-user/level password security
- Modifiable report format allows you to print only what you want
- Contains a database of more than 220 lock types from more than 50 manufacturers
- Allows entry of new manufacturers through custom hardware feature
- Automatic manufacturer specification fill-in with easy editing capacity
- Help file and tutorial
- Download systems to CodeMax® or Tiger SHARK™ machines for error free key cutting
- Very intuitive and easy to navigate
- Able to generate 1 to 5 levels in list format
- Displays change keys, block masters, row masters, vertical & horizontal group masters, page masters, multi-page masters, and the TMK in page format
- Bittings and pinnings displayed on screen and in reports

Advanced Features:

- Supports cross-keying
- Supports total position progression and rotating constants
- Computes driver and control pins in interchangeable core (IC) systems
- Allows manual entry of existing systems
- Allows customized progression sequence
- Allows entry of descriptions for each biting
- Search by biting, key symbol or description
- Supports sectional master keying for systems using graduated or progressive keyways
- Allows manipulation of the key biting array
- Powerful database feature allows you to export your systems to Excel and other formats
- Link multiple projects to your customers in the HPC-exclusive cross-program database

Track Keys, Personnel & Locations

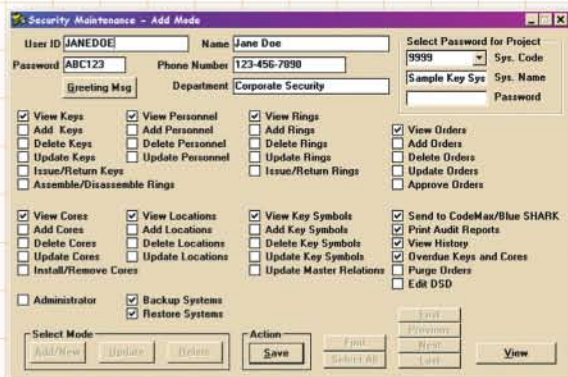

KeyTrail®
No. KT-CD

KeyTrail® Lite
No. KT-CDLITE

KeyTrail® Lite is a simplified version that tracks only the Personnel, Keys, Locks and Locations at one facility.

KeyTrail® is designed to provide complete management of keys, the people that hold them and the doors they open, all from one screen. A vital aspect of the security at any facility is the ability to instantly determine who has access to specific locations. Whether you are a locksmith managing an apartment complex or the facility manager at a university, KeyTrail® allows you to monitor the entire operation.

- **View up to 8 different windows on 1 screen** to see the lists of Personnel, Keys, Rings, Key Cabinets, Locations, Locks, Door Hardware and all keying information, with an unlimited number of records at an unlimited number of facilities
- **View up to 4 different windows in KeyTrail® Lite** at one time to see lists of personnel, keys, locks and locations

- Easy to use with **drag-and-drop technology**, pull-down menus and keyboard shortcuts
- A large variety of **detailed reports** is available to provide concise information
- Network compatible for use in **multi-user environments**
- **Flexible security** easily controls the information that users may access
- **Perfect for universities, hospitals, office buildings, factories, airports, institutions, etc.**

KeyTrail® has a very flexible security feature which allows you to set up one or many System Administrators. In turn, they can set up an unlimited number of security profiles to limit or give unlimited access to users on an individual basis. This will allow some people to only have the ability to view records, while giving others the ability to loan out keys without having access to key cutting information. As an additional security feature, **KeyTrail® tracks all transactions, including the system user who performed the transaction.**

Hardware Schedule

The Hardware Schedule window records hinges, closers, exit devices and any other door hardware whether it is in-stock or installed at a Location.

Key Cabinets

The Key Cabinets window lets you keep track of all your keys in inventory as they are stored in the actual cabinets.

Locations

The Locations window displays a list of the doors that the keys open.

Cores

The Cores window keeps track of all of your cores, cylinders, and locks whether they are installed or in stock.

Key Symbols

The Key Symbols window displays the bitting and depth & spacing information. Separating Key Symbols from Keys and Cores allows people to view or loan out keys and install locks without having access to vital key cutting information.

Personnel

The Personnel window displays a list of the people in the facility.

Rings

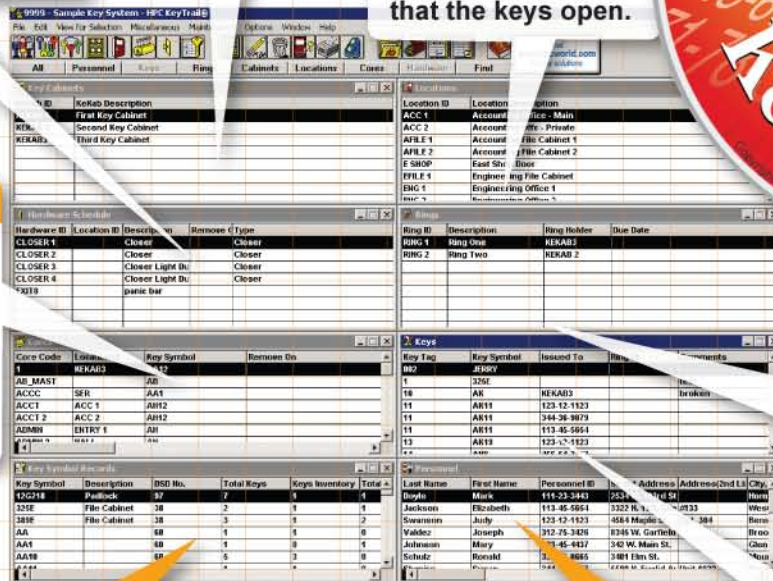

The Rings window groups keys together. Once together they can be moved and assigned as one.

Keys

The Keys window displays a list of the keys that open the doors.

Support

Knowledgeable and Friendly
USA Factory Technical Support

**Features of KeyTrail®:**

- Instantly see who has access to a location
- Easily see which keys have been issued and which keys remain in cabinets or in stock
- Simple to use. With easy to understand icons, drop down menus, keyboard shortcuts, as well as a comprehensive help file
- Flexible security feature. The System Administrator can set up an unlimited number of security profiles for other people who will be using the system, plus KeyTrail® provides an audit trail that tracks all transactions
- Optional work orders to track cylinder installation and key duplication
- Interface with HPC's MasterKing® software, Tiger SHARK™ and CodeMax® to make an all encompassing key producing/tracking package
- Information can be imported or exported in either tab delimited or comma delimited format
- KeyTrail® can be installed on an individual PC or on a network server
- Knowledgeable and friendly, USA factory technical support

KeyTrail® provides numerous reports on Keys, Key Symbols, Rings, Locations, Cores and Personnel including:

- Personnel and the keys they hold
- Keys and the locations they open
- Locations and the personnel that have access to them
- Lost key report and overdue key report
- Audit trail
- Work orders

The Ultimate Code Retrieval Program

From the leader in locksmith software HPC's **CodeSource®**, the ultimate code retrieval program is actually 8 programs in 1!

We all know the importance of offering code-cut keys; it is what separates locksmiths from key cutters. At the heart of every locksmith shop is the code program, a vital aspect of its operations. **HPC's CodeSource® is the most comprehensive, user-friendly code retrieval program on the market today!** It has a database of **millions and millions of codes** that can be accessed quickly and easily. The Windows® operating system allows for **quick maneuvering** through the program with the point and click method or by clearly marked **hot keys**. CodeSource® makes looking up a code completely effortless. There is no need to have extensive computer knowledge to run the program, simply follow the instructions on the screen. If you have questions, on-screen help is available at the touch of a button.

CodeSource® is 8 Programs in 1

- 1 Code Search** - The versatile search function instantly searches through millions of codes. Search by any combination of key code, lock manufacturer, vehicle manufacturer or model, key blank number or code card number.
- 2 Code Specifications** - This screen provides all the information needed for cutting keys on any HPC Key Machine including the code card, key blank, jaw, cutter and of course, the bitting. The depths and spaces are listed in inches or millimeters. The actual key specifications are needed if you are using a micrometer machine or need to check the measurements of a key.
- 3 Custom Codes** - Create your own code series to keep track of your own keys. If you have a proprietary lock you also can store the depth and space data in CodeSource®. From there you can access all of the key cutting information, including printing custom code cards.
- 4 Search by Bitting** - When presented with only a piece of a broken key, enter the known cuts and CodeSource® will display all codes and bittings that contain that partial bitting. Many vehicles use only part of the ignition bitting in the door locks. If you do not have the code number, it is possible to remove and decode the door lock. By entering the cuts from the door lock you can quickly find all the possible bittings for the ignition. The innovative key progression offers multiple sorting options for all of the possible bittings minimizing the number of key blanks needed to cut all possibilities.
- 5 Key Blank Cross-Reference** - Most locksmith shops have hundreds of different key blanks, and there are many manufacturers offering replacement blanks. Keeping track of all of these numbers is a daunting task. The comprehensive cross-reference in CodeSource® makes it easy to identify suitable alternatives. There is a field to record the location of each key blank, allowing you to quickly find the blank you need, and you can print customized Key Tags to label the hooks on your key boards.

Scan for more info!

6 Print Code Cards - HPC's Blitz™ can be found in practically every locksmith shop, and with CodeSource® you have the ability to print any code card quickly and easily. Your work does not have to stop because you cannot find the correct card. A simple click instantly prepares a code card, that is ready to print for:

- Blitz™ and Switch Blitz™
- The Punch Machine™
- Pocket Sized Key Decoder

The code cards include the space and depth measurements (in inches or metric), applicable code series, appropriate cutter and jaw to use and a picture of the key in the jaw showing the proper gauge point.

7 Customer Database - A sign of a successful business is the number of repeat customers.

The customer database in CodeSource® aids in customer retention by providing you with custom-printed business cards. These cards contain your business name, contact information and even your own logo, as well as the name of your customer and a unique code number that only you can decipher. Only on your computer can this unique number be instantly translated to the key specifications for your customer. By giving these cards out with every new key cut, your customers will quickly learn to rely on your excellent service and call you for their next job!

*Another
HPC Exclusive!*

8 Car Opening Information - Often the need to code cut a key stems from a vehicle lockout. From its introduction more than 10 years ago, The **Interactive Car Opening Authority®** has been the leading vehicle entry reference. It contains the opening techniques for the latest 17 years of vehicles, including all of the current models. The single screen interface makes it quick to find the opening method, airbag locations and transponder information with only a few clicks of your mouse. In addition, the program includes full-action videos showing how to perform each opening method. There is also in-depth information including detailed photographs showing specific opening techniques and lock removal procedures for dozens of the latest vehicles.

Customizable Key Blank Cross-Reference

Customizable

Two additional fields for adding your own key blank manufacturers or look-alike cross-references.

Sortable

Complete sortable key blank cross-reference listing all of the largest key blank manufacturers around the world.

Key Tags

Print customized Key Tags to label the key boards in your shop.

Print Options

Print to standard paper for a temporary card or use card stock or the included "tear-proof" paper for a long lasting card.

Not having the right code card no longer has to interrupt your day. **With HPC's CardWare™ Code Card Generating and Printing Software you can create a code card for any key you need to cut!**

You can search by manufacturer, model, code series, key blank, DSD number or card number to access the appropriate depth and space data.

You also can add your own custom depth and space data. From there, a simple click instantly prepares a code card that is ready to print.

The code cards include the depth and space measurements (in inches or millimeters), applicable code series, appropriate cutter and jaw to use, and a picture of the key in the jaw showing the proper gauge point.

CardWare™ prints code cards for:

All the Car Opening Information You Need

From its introduction more than 15 years ago, HPC's **Car Opening Authority®** has been the leading vehicle entry manual and reference guide. The key to its popularity was the development of the **HPC's Proven Methods of Car Opening**. The Research Staff at HPC determined that every vehicle could be opened by one or more of these opening methods. Once you know how to perform these techniques, all you need to know is which method to apply to the car you need to open.

Interactive Car Opening Authority®

The **Interactive Car Opening Authority®** contains the opening techniques for the latest 17 years of vehicles, including all of the current models. The single screen interface makes it quick to find the **opening method, airbag locations and transponder information** with only a few clicks of your mouse. In addition, the program includes full-action videos showing how to perform each opening method. There is also **in-depth information including detailed photographs** showing specific opening techniques and lock removal procedures for dozens of the latest vehicles. This program is the **most complete and comprehensive car opening reference available**. It Includes:

- *Opening Techniques for the latest 17 years of vehicles. Includes air bag and sensor locations.*
- *Transponder and On-board Programming information.*
- *Full-action video shows how to perform each opening method.*
- *In-depth photographs and details for dozens of vehicles.*

Interactive Car Opening Authority® (PC) No. COA-CD

The Interactive Car Opening Authority® is part of CodeSource® and is also available separately.

Car Opening Authority®

The printed version of the **Car Opening Authority®** is a single volume manual that contains the opening techniques for the latest 17 years of virtually every car, truck, and SUV on the road. The simple to use Models Index leads to **clear concise diagrams of each opening technique**. Be prepared for any lockout you are called to open. **The Car Opening Authority® is the most complete and comprehensive car opening reference on the market.**

Educational and Reference Material

Whether it is to educate new employees or to use for their own reference, every locksmith will benefit from owning training information on the core skills of their trade. Studies have shown that instructional information presented in an audio-visual format is the most effective form of training and provides the greatest level of knowledge retention.

The Audio-Visual Technical Education titles combine an audio CD-ROM and a printed book to provide a dual-mode training system.

The Learning Center Reference Collection is a series of technical manuals that teach important skills every locksmith should know.

The Live Action Learning Software Series from HPC is a collection of interactive guides covering vital aspects of locksmithing.

Picking Tubular Locks

The ability to service tubular locks can set you apart from your competitors. Often, the first step in servicing the lock is the ability to pick it open. Picking tubular locks requires different tools and a different technique from picking standard locks.

Scan for more info!

How to Pick Tubular Locks

This **Audio-Video CD** introduces the specialized tools and techniques used in picking common tubular locks. After studying this selection you will understand how tubular locks work and how they can be defeated. This interactive guide, with the help of illustrations and animation, will teach you how to pick tubular locks like an expert in no time at all.

How to Pick Tubular Locks
No. HT-PTL1

Basic Tubular Picking

This **Illustrated Book** covers the basic theories and procedures necessary for compromising the more fundamental types of tubular locks. Both the locks in question and the necessary tools are fully-illustrated and described in detail.

Basic Tubular Picking
No. LC-2

Advanced Tubular Picking

This **Illustrated Book** picks up where its predecessor, Basic Tubular Picking, leaves off. This volume describes the more complex and unusual types of tubular locks and the techniques necessary to pick them open.

Advanced Tubular Picking

Impressioning

Basic Impressioning
No. LC-5

Picking and raking locks is the quintessential talent of a security specialist and what separates a locksmith from an amateur.

How to Pick Locks

This **Audio-Video CD** explains the difference between picking and raking, and teaches how to perform both techniques. Learn about various tools including picks, hooks, rakes, tension tools and plug spinners and the proper way to use them. This interactive guide is a necessity for anyone who wants to learn or improve their ability to pick pin and disc tumbler locks.

Picking and Raking of Pin and Disc Tumbler Locks

This **Workbook and Audio CD** will teach you the preliminary preparations before picking, the differences between picking and raking, how to perform both methods of opening, correct tool selection and their application on various types of cylinders.

Basic Picking and Raking

The **Basic Picking and Raking Book** describes in detail the theories and techniques for picking standard pin and wafer tumbler locks. All the necessary tools (including picks, rakes and tension wrenches) are listed and fully-illustrated for convenient cross-reference.

Also available is a **Multi-Language CD** containing convenient PDF files of the Basic Picking manual in **English, French, German, Japanese and Spanish**. Read on your computer or print out the language of your choice.

Basic Impressioning

Every locksmith should have an arsenal of methods to gain entry through locked doors. One viable technique is impressioning, creating a new key by reading pin marks on a key blank. This **Manual** explains the essential theories and methods for making a key by impressioning. The proper technique for blank preparation, obtaining marks and the ability to recognize marks are covered in detail.

See the Clean Grip Impressioning Tool in the Tools Section.
(No. CGIT-10)

Master Keying

Providing master keyed systems is an essential part of servicing the highly profitable commercial, industrial and institutional customers in your market. Before you can offer master key systems, you need to understand the fundamentals of master keying.

Safes and Vaults

Safe work is a high-profit, specialized service. With the proper skills, tools and reference books you can become an expert safe technician. HPC offers three books important for servicing safes.

The Art of Manipulation

Manipulation, also known as the "Hear, Feel and See" method, was discovered and developed by a small group of safe experts. After much deliberation, two of these experts decided to pass on their information to other safe professionals and published this invaluable book. Open combination locks without drilling, burning or forcing! This book was written for locksmiths and safe professionals to teach the techniques needed for opening and servicing safes. **The Art of Manipulation illustrates the step-by-step procedures needed to manipulate lever type fence locks.** Additionally, it explains the methods used in the rotary fence gear driven, rotary fence spring loaded, straight in tail piece, bottom drop and off-set gear driven type locks.

Information for modern safe locks is readily available from the manufacturers and importers. However, **as a Safe Professional you need to be prepared to service the classic safes** that were built to last for decades.

Safe and Vault Manual

The Safe and Vault Manual covers the important topics of drilling locations, changing the handing of the safe, servicing the lock and time lock operation on a wide variety of safes and vaults dating back to the early 20th century. This enduring reference manual includes **over 250 illustrations, 1000 factory try-out combinations** as well as the directions for operating and changing the combination of safe and vault locks (as found in the Safe Combination Changing Manual).

Safe Combination Changing

The Safe Combination Changing Manual contains original direction sheets that explain how to operate and change the combination on a wide variety of classic safe locks dating back to the early 20th century. This invaluable reference contains **85 pages and hundreds of illustrations and diagrams** as written by the safe lock manufacturers, including Diebold, Eagle, Mosler, Sargent & Greenleaf, Yale and York safe locks.

Long Reach Car Openers

Switch Stick

#1

Scan for more info!

Through Car

The **Switch Stick** is a 5-foot (150cm) long **bendable** tool with a **unique hook** end designed to open cars from the inside. This tool slips into a vehicle between the window and door frame. Once inside, the Switch Stick acts as a third hand allowing you to flip switches, lift buttons and hook handles. The hook features a protective coating and rubber cap, so that the **tool will not damage the interior**. The Switch Stick is ideal for vehicles with side impact airbags where customers may be hesitant to have tools enter the door cavity. It is also great for vehicles with flush finger-tip lock switches such as Lexus, Volvo and others.

Switch Stick
No. CO-80

Thru Car Clutch™ and Super Thru Car Clutch™

Through Car

The **Thru Car Clutch™** and **Super Thru Car Clutch™** are two longer versions of HPC's patented Clutch™ Tools. When the two-part handles of the tool are separated, the hook at the end of the tool is pulled inward causing the tool to grip or bind. What sets these two tools apart is that they are **designed for "in-the-car" methods**. The Thru Car Clutch™ car opening tool is a full 5 feet (150cm) in length, making it **perfect for hooking an inside door handle**, manipulating lock buttons and switches or to retrieve keys! Both of these tools have a **flexible shaft and a retractable hook with a rubberized tip** for improved grip. The Super Thru Car Clutch™ Tool is 7 feet (213cm) long for larger, wider vehicles. HPC's Thru Car Clutch™ tools give you that extra hand inside the car.

5-Foot Super Snare

#1

HPC's **5-Foot Super Snare** allows you to enter a vehicle and **pull up buttons, grab keys, pull open levers** and much more! This 5-foot long (150cm) tool is a metal tube with an internal wire that forms a loop on the end. To open the loop, slide the two-part handles together. To close the loop, slide the handles apart. The 5-Foot Super Snare is **easily bendable** and has a rubber tip to help protect the interior of the vehicle. Replacement wire available (No. CO-78W).

Lasso

Gold Finger

NEW

#1

Gold Finger

The HPC **Gold Finger** is a 5' long (150cm) bendable car opening tool with two special working ends. The hook end is designed to mimic your finger action, pulling levers and flipping rockers. The opposing end is perfect for grabbing switches that must be pushed. The bright yellow ends make them easy to see in dark interiors and the super strong steel body will outlast similar tools.

Gold Finger
No. CO-90

Since 1956, HPC has developed a worldwide reputation for designing a wide range of innovative car opening tools to make your job easier!

Through Car

Twin Hooks

The HPC **Twin Hooks** has a **double-hook end** that opens and closes with a simple push and pull of the tool handle. Reaching across vehicles and grabbing door handles has never been easier! The double hook ends overlap each other as they close, giving **twice the strength**, making it a very solid hold. The Twin Hooks securely grabs onto door handles as far as 7 feet (213cm) away.

Twin Hooks

Jim Style Car Openers

Original Slim Jim™

HPC's **Original Slim Jim™**, introduced in 1967, has been **the auto entry tool by which all others have been judged!** While automobiles continue to change every year, the Original Slim Jim™ is still the best way to open large numbers of vehicles. This makes it an essential tool for all auto entry specialists.

Original Slim Jim™ No. CO-10

Bell Crank

Lazy Pawl

Vertical Rod

Horizontal Rod

Scan for more info!

Pocket Jim™

The **Pocket Jim™** with its compact modular design fits in your pocket or glove compartment. The **segmented sections give you the ability to create just the right tool for the job.** Includes three specialized tips for grabbing, pulling and pushing, as well as a through-the-handle tip. The Pocket Jim™ can grasp vertical linkages and because of its thin body, **can be rotated a full 360 degrees inside the door** to locate other offset vertical linkages.

Super Jim™

The **Super Jim™** is a **wider version of the Original Slim Jim™**. This configuration has been designed to accommodate additional automobile models, as well as expedite the entry time on many vehicles. The wider, quicker Super Jim™ is the natural evolution of a classic. Choose the Super Jim™ for stiffer flex, strength and speed!

Super Jim™ No. CO-11

Bell Crank

Lazy Pawl

Vertical Rod

Horizontal Rod

Big Jim™

The **Big Jim™** measures a full 28.5" (72cm) long. **Its extended length will open additional vehicles that have linkages and bell cranks deeper in the door.** While this specially designed tool will open almost every vehicle that the Original Slim Jim™ does, you will appreciate the additional models you can open with the longer length of the Big Jim™ car opener.

Big Jim™ No. CO-24

Sir James™

The **Sir James™** is the deluxe version of the Super Jim™. The Sir James™ **nickel plated steel blade has embossed graduations** for precise entry depths. The built-in note pad allows you to record exact opening procedures. A snap-lock protective leather handle protects your valuable notes.

Sir James™ No. CO-18

Pocket Jim™ No. CO-58

Under & Over Car Openers

Caddy Killer™

The **Caddy Killer™** was one of the very first Under & Over Tools. It is a hybrid approach of In-the-Door and Through-Car opening. Inserted into the door cavity, **these tools go under the window and over the door panel on the inside of the car** to pull handles and slide lock buttons to open the door.

Caddy Killer™ No. CO-60

Under & Over

Stretch Killer™

The **Stretch Killer™** has the **most universal dimensions** of all of the Under & Over car opening tools. The height of the arc is greater than the Caddy Killer™, but the working end hangs lower, allowing you to reach locks that sit deeper in the door panel.

Stretch Killer™ No. CO-61

Under & Over

Super Killer™

The **Super Killer™** with its **extra length** and great strength, can be used to open a wide variety of vehicles. This tool has the tallest and **widest arc** of all of the Under & Over tools, allowing it to get under the deepest window and around the widest door panels. This tool works best on vehicles with thicker doors.

Super Killer™ No. CO-70

Under & Over

Horizontal & Vertical Rod Openers

Horizontal Clutch™

Vertical Clutch™

HPC's patented **Clutch Car Openers** are unlike any others on the market. When the handles of the tools are separated, the hook at the end is pulled inward causing the hook to grip or bind the linkage rod. These innovative car entry tools simplify the "in-the-door" method of vehicle entry. Two different styles are available for horizontal linkages and vertical linkages.

Stretch Double "L"

Short Double "L"

HPC's **Stretch Double "L"** and **Short Double "L"** tools are **highly versatile car openers**. With an upward hook on one leg and an outward hook on the opposite leg, they can easily grab and bind vertical linkages from above or below. The hooks are laminated with a **slip resistant coating** and are able to **reach around many shields**.

Stretch Double "L"™ No. CO-71

Short Double "L"™ No. CO-72

Button Tools

Fish Hook

The **Fish Hook** tool is for vehicle entry when the lock button is visible. Used with an HPC Wedge, the tool enters the auto interior, engages the button and **with a simple twist, raises the button**. This unique design features a long reach **memory-flex** rod for bending to the required shape. Replacement hook available (No. CO-86H).

Fish Hook No. CO-86

Button Clutch™

Similar to HPC's patented Vertical and Horizontal Clutch™ Tools and Super Snare, the new **Button Clutch™** will grab lock buttons and not let go! Combined with an HPC Auto Wedge, this hybrid tool will make auto opening **quick and effortless!** Slide the tool between the vehicle door and door frame and place loop over the lock button. While holding onto the bottom handle, lift the top handle to close the wire loop onto the button. Then just pull the button up and unlock the door.

Button Clutch™ No. CO-87

Button Clutch™

Lasso™

The **Lasso™** tool is for vehicle entry when the lock button is visible. It is made of **high quality "poly-flex" material** with a waxed high-strength lanyard. The tool allows you to knot the string around the lock button providing a non-slip grip to unlock the door. The Lasso™ is **excellent for those luxury car openings** where other tools may damage the interior.

Lasso™ No. CO-73

Tight Door Frame Tools

Skinny Twister™

The **Skinny Twister™** is a unique twist in car opening when vehicles put you in a tight spot. The Skinny Twister™ is the **thinnest through-car tool available**. It easily slips through openings where rod tools don't fit. So thin that wedges aren't needed. The **Skinny Twister™ has two different working ends** and can be bent into almost any configuration. It can twist and turn as it squeezes into the vehicle.

Skinny Twister™ No. CO-88

Skinny Twister™

Skinny Flipper™

The **Skinny Flipper™** is ideal for vehicles that won't wedge open! One of the thinnest through-car tools available, it **slides between windows and weather-stripping where rod tools just can't fit**. The Skinny Flipper™ is made of super bouncy spring steel and the laminated body allows you to **manipulate the working end from outside of the car**. You'll appreciate the time you save when you use this new solution to tight door seams!

Skinny Flipper™ No. CO-89

Skinny Flipper™

Wedges & Accessories

Air Wedge®
No. AW-99

Universal Air Wedge®
No. AW-100

Ultimate Auto Wedges
No. AW-34 3/4" (19mm)
No. AW-38 3/8" (9.5mm)

Power Wedge™
No. PW-100

Lever Wedge™
No. LW-100

Air Wedge®

The **Original Air Wedge®** & **Universal Air Wedge®** are **HPC innovations**. Simply slide the wedge between the vehicle door and the weather stripping on the door frame. Squeeze the pump bulb, inflating the Air Wedge®, separating the vehicle door from the frame to **create an opening suitable for the insertion of a car opening tool**. The Universal Air Wedge® features increased width, giving you a **larger gripping area** for inserting the wedge into the top corner of tighter fitting doors. Both are equipped with a release valve and work exceptionally well with the HPC AutoSleeve™ (No. AS-1). **Rugged and reliable, tested and proven, HPC Air Wedges have won their place in the Locksmith's arsenal.**

Ultimate Auto Wedges

The **Ultimate Auto Wedges** are designed for smooth, safe insertion and will not fall into door cavities. The special angled tip allows for easier insertion and the **sure-stop edge** stops you from pushing the wedges in too far. The Ultimate Auto Wedges feature a tapered body that prevents them from popping out and the special "illumination hole" **holds your probe light in place at any angle**. Available in two popular sizes, 3/4" (19mm) and 3/8" (9.5mm) maximum thickness.

Power Wedge™

The **Power Wedge™** is a revolutionary auto entry device designed to aid in opening even the most difficult vehicles! This spring loaded **compound lever** safely spreads a vehicle door away from the body, allowing for the easy entry of a through-the-car opening tool. The Power Wedge™ slides into the opening between the vehicle's door and frame at the top of the door. The **rubber-coated ends protect the vehicle** from scratches and the adjustment knob allows you to control how wide you need the door to open. Simply turn the knob clockwise and watch as the door slowly opens giving you room to use a car opening tool to open the vehicle safely from the inside.

Lever Wedge™

The **Lever Wedge™** is unlike any other tool in the industry! It has been designed and engineered from the ground up. It features a **double pivot point** that allows you to spread a vehicle door from its frame and then with **a simple push, hold it open**. Once in place, the door can be separated farther with the HPC Lever Wedge's secondary lever action. This tool will hold its position with **no need for a second wedge** to hold the door open!

AutoSleeve™

The **AutoSleeve™** helps **prevent damage** to weather stripping and automobile finishes. This hardened **plastic interlocking envelope** is ideal for separating weather stripping from door frames or windows without damage. Once in place, the AutoSleeve™ gives you a **protective tunnel to insert your car opening tool** without worry of scratching or damaging your customer's car. Show your customers that you care enough about their vehicle not to scratch it! The AutoSleeve™ also aids in inserting HPC Air Wedges.

AutoSleeve™
No. AS-1

Flex-A-Light™

The **Flex-A-Light™** is equipped with a durable LED to stand up to heavy use. The **long-lasting LED** is cool to the touch, so that you don't have to worry about a hot bulb breaking when it comes in contact with a cold window. **The Flex-A-Light™ is more flexible than other bending lights, yet rigid enough to keep straight.** Just plug in the light extension and the light is on. The tool includes a suction cup to easily secure the light to the window, or plug in the 36" (91cm) extension and you can keep the power handle in your pocket. Requires 3 AA batteries.

Flex-A-Light™
No. FAL-15X

Interactive Car Opening Authority®

The **Interactive Car Opening Authority®** contains the opening techniques for the **latest 17 years of vehicles**, including all of the current models (more than 1,000 in all). The single-screen interface makes it quick to find the **opening method, airbag locations and transponder information** with only a few clicks of your mouse. It **includes full-action videos** showing how to perform each opening method. There is also **additional in-depth information for over 100 vehicles**. Detailed photographs show specific opening techniques and lock removal procedures. The Interactive Car Opening Authority® is **the most complete and comprehensive reference manual available!**

Interactive Car Opening Authority® No. COA-CD

The Interactive Car Opening Authority® is also available as part of CodeSource®. See the software section for details.

Loaded with photos, videos, illustrations and car opening and servicing information!

Also available in print.

Car Opening Authority® No. COA-22

PRODUCTS THAT MAKE DOLLARS & SENSE

Pocket Jim™ No. CO-58

Opening today's cars comes with an ample supply of new challenges. You never know which tool you will need on any given day. Count on HPC to provide you with innovative solutions for the "impossible-to-open" cars and twists on classic tools. You can't carry every tool you need everywhere you go, but HPC can help you bring a good selection of tools anywhere you go.

CO-58 This modular kit fits in your glove compartment and consists of three different tools of varying lengths and multiple uses.

AKK-P17 A full pick set and car opening kit in a pocket size case.

AKK-ST Flexible, yet stiff, this bendable tool slides into the tightest openings and twists and turns to open cars that other openers only dream about. **Adapting to your customers' needs equals more sales.**

We understand that sometimes it is not cost effective to buy a dedicated machine for specialty keys that you don't cut that often. But your customers still need them cut. We know that you have limited space in your vehicle for multiple machines. But your customers still need their keys. If you are cutting more keys or just starting out and are looking for a new machine, don't forget that sometimes you will need a code machine and sometimes you will need a duplicator.

Adapting to your customers' needs equals more sales.

Picks

Spring Steel Picks

Spring Steel - HPC Picks are made from the finest grade spring steel, and are stamped with the grain, ensuring a strong and flexible pick. An essential part of the production is the tumbling process that removes the sharp edges from the picks.

Scan for more info!

Spring Steel Picks with Stainless Steel Handles

Spring Steel with Stainless Steel Handles - This combination of a fine grade spring steel pick with a stainless steel handle gives the user the slightly heavier feel preferred by many locksmiths.

PICKS

TIP OPTIONS

HOOKS

Hooks are used for actual "picking" one chamber at a time (as opposed to raking). They are particularly useful when the lengths of the bottom pins are significantly different.

DIAMONDS

Diamonds are used for picking or raking. They are especially effective for use on locks with wafer tumblers (eg. car locks).

RAKES

Rakes are used for raking (manipulating the pins in all of the chambers at the same time). They are available in several different patterns.

BALLS

Balls are also used for raking, and are available in several different patterns.

2000 Series Stainless Steel Picks

Stainless Steel - Using a patented cutting process, these picks are made from top-quality stainless steel. This provides for additional strength. Plus, the steel is thinner making the blades even more flexible. This combination is the secret behind the excellent performance of the 2000 Series picks and extractors.

Color Coded Picks

Color Coded Picks - HPC's unique color coded picks add an improved level of efficiency in identifying the picks in your case. The aluminum handles provide a lighter feel than stainless steel handles and the bright colors make it easier to instantly identify the type of tool you need.

Spring Steel Pick with Foam Grip

These **Spring Steel Picks** feature a super-lightweight super-soft grip for comfort, while retaining the feel necessary during picking.

**ACTUAL
SIZE**

Foam Grip Only

Soft Foam **Pick Grip** fits picks and extractors with or without metal handles. No adhesive required. It is 3/16" (4.75mm) round and the inside diameter expands to also fit on other tools.

No. PICK GRIP

Standard Spring Steel 2-in-1 Pick

An HPC Classic - Shown actual size, This combination rake and diamond pick is made from the finest grade spring steel, stamped with the grain, ensuring strength and flexibility. Two working tips in one!

No. P-13
(.022 thick)

Tension Tools

Standard Tension Tools

Proper tension is the key to picking and raking locks. Whether your tool of choice is a hook, diamond, ball, rake or HPC's Electropick™, the lock will not open without just the right amount of tension applied to the cylinder. HPC manufactures a wide variety of tension tools to suit the needs and preferences of most every locksmith.

LIGHT TENSION

MEDIUM TENSION

RIGID TENSION

Tension Tools for Tulip-Shaped Knobs

These tension tools are designed for use on tulip-shaped door knobs.

Lever-Type Letter Box Lock Tension Tools

These tools are designed for use on lever-type letterbox locks. They apply tension on the levers, while moving the levers to the shear line, opening the lock.

Variable-Size Tension Tool

The tip of this tension tool can be compressed to fit into keyways of various sizes. It is designed for standard locks, including automotive door locks.

Double-Sided Tension Tools

These tension tools are for use on double-sided locks such as automotive door locks, furniture, cabinets and other cam locks.

Torque and Tension Tools

Incorrect tension is one of the most common causes of picking failure. **Use of these tools provides an easy method to apply the correct amount of tension every time.** All Torque and Tension tools provide a large opening diameter allowing unrestricted entry of picking tools. The **dual prongs assure even torque**, always keeping the plug in proper alignment. All units are feather weight and pocket sized with easy to hold knurled collars.

No. TNT-2

Features easy-to-read tension indicator and dual-coil spring construction.

No. TNT-15

A simplified tension device without spring controlled tension.

No. TNT-20

Incorporates Spring Loaded Adjustable Prong with other TNT's spring controlled tension.

No. TNT-21

The longer prongs make this model excellent for automotive use.

Scan for more info!

Hands-Free Tension Tool Kit

HPC's **Hands-Free Tension Tool Kit** takes the difficulty out of picking! No need to fumble with the tension. **Simply slip the Hands-Free Tension Tool into the cylinder keyway (vertical or horizontal), slide and set the weight to adjust the amount of tension and then let go!** All that's left is raking the pins! The kit comes complete with the Hands-Free Tension Tool and a matching 2-sided Rake/Diamond Pick. The Tension and Picking Tools clip together with a specially designed holder. Difficult locks will become easier to pick, and simple locks will pick quicker with ease.

**Hands-Free
Tension Tool Kit
No. HFTT-KIT**

Flip-It™ Plug Spinner

HPC's **Flip-It™** is an incredibly handy tool that gets you out of a tough situation. When picking a lock in the wrong direction (intentionally or by error), **the Flip-It™ will flip the cylinder plug past the upper pins and save you the job of repicking.** The Flip-It™ has two exclusive features. The two pin Quick Lock/Release feature allows for easy release of the rotating action. The sure stop feature prevents overwinding in either direction. It's a perfect complement to your HPC pick set. (No. FIT-BLADE Blade only).

**Flip-It™ Plug Spinner
No. FIT-2**

Computer Generated Pick Set

Computer Generated Pick Set
No. COMP-1

The tools in the **Computer Generated Pick Set** provide a unique method for bypassing a lock. They are not used for picking or raking; instead, **the wave patterns were designed to replicate the cuts on all of the possible working keys**. By gently lifting the picks and using very light tension, **the lock will open as if you were using a properly cut key**. The set contains 9 picks made of hardened stainless steel and 2 tension tools made of tempered spring steel. A genuine leather case is included. (No. COMP-CASE Case only).

Warded Padlock Pick Set

Working as try-out keys, the **Warded Padlock Pick Set** efficiently opens warded padlocks. **Five different patterns will defeat virtually all warded padlocks.** Avoid costly destruction of padlocks with this economical, easy-to-use set.

Warded Padlock Pick Set
No. PKS

Padlock Shim Pick Set

This 20 piece **Padlock Shim Pick Set** is a fantastic alternative to picking, and in many situations is the only way to open a padlock in seconds. **The shim picks' unique design makes them amazingly successful.** Their specialty is opening laminated type padlocks (the most popular variety in use today), though they will **open almost any lock which has a spring lever latch locking bar** (as opposed to a ball locking latch), providing there is enough clearance to allow the shim to operate. Set contains 5 each of the 4 most common shackle diameters, which enables it to open a myriad of padlocks.

Padlock Shim Pick Set
No. PSA-20

Double-Sided Pick Set

The **Double-Sided Pick Set** is designed specifically for use on double-bitted cam locks. The set contains 4 picks which provides 8 different configurations. **These picks will quickly defeat the most popular double-bitted wafer tumbler cam locks,** commonly found on glass showcases, office furniture and some cash boxes. A plastic storage case is included. Measures: 5.375" x 3.5

Double-Sided Pick Set
No. DSP-1

Cross Pick

The **Cross Pick** is designed for 4-way cross locks. With the removal of one pin, it can also be used on 3-way cross locks. **These locks are used on office furniture and other cam lock applications** and the Cross Pick is the only choice for bypassing them. A genuine leather case is included. (No. COMP-CASE).

Pick Guns

Electropick™

The Electric Pick Gun is another innovation of HPC. The **Electropick™** is the **original electric pick gun**, and is still the best! The amount of "bounce" in the pick blade is **adjustable, allowing you to modify the action for different locks**. It comes complete with 2 straight pick blades, 2 angled pick blades, 1 medium tension wrench, 1 rigid tension wrench and an AC charger. The chargers are **available in 120VAC and 240VAC**, and with plugs suitable for USA and Canada, as well as Europe, the United Kingdom, Australia and New Zealand. In addition, an optional 12VDC charger with a cigarette lighter plug is available.

Electropick™ No. EPG-1

Comes complete with:
(2) No. P-2 straight pick blades
(2) No. P-3 angled pick blades
(1) Medium Tension Wrench
(1) Rigid Tension Wrench
(1) AC Charger (120V or 240V)

No. EPGC-12A Optional 12VDC Charger

Scan for more info!

No. EPG-1E for Europe

No. EPG-1UK for United Kingdom

No. EPG-1AU for Australia, New Zealand

Pistolpick™

HPC's **Pistolpick™** is designed to easily rake open pin and disc tumbler locks. **Rapid squeezing of the trigger bounces the pick needle, raising the pins or discs to the shear line.** All you add is proper tension, and the lock is open. All parts, including the main housing, are made from **nickel-plated cold rolled steel** for protection against rust and to provide an attractive, **high quality pistol-style finish**. The Pistolpick™ comes with 3 pick blades and 2 tension wrenches. An optional leather holster case is available (No. HPG-CASE).

Pistolpick™ No. HPG-10

Comes complete with:
(2) No. P-2 straight pick blades
(1) No. P-3 angled blade
(1) Medium tension tool
(1) Rigid tension tool

No. HPG-CASE Optional Case

Replacement Blades

Stainless steel provides greater strength and flexibility, in a thinner profile. These blades are perfect for locks with particularly narrow keyways and for anytime you want extra performance.

For Pistolpick™, Electropick™ and Stainless Steel Pen Pick Set

Standard Tubular Picks

Scan for more info!

HPC developed tubular picks that work on all of the pins at the same time. This has proven to be the **most efficient and effective method for defeating tubular locks**. With a few pumps in the lock, the feelers on HPC Tubular Picks move into position and **mimic the pattern of the original key**. You can then decode the feelers and cut a new key by code, duplicate a key directly from the pick, and of course, open the lock. **HPC offers 7 different models of tubular picks**, which can be separated into two groups, Standard and Specialty. The standard picks work on 7-pin standard size and pattern locks. The specialty picks work on variations of the 7-pin locks.

Standard 7-Pin

Standard 7-Pin
No. TLP-C

The original design of the **Standard 7-Pin** from more than 45 years ago, and still a favorite among locksmiths. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FEEL Feelers only).

7-Pin Standard

Model B

Model B
No. TLP-CMOD-B

Proper tension on the feelers is a critical aspect of defeating a variety of locks. The knurled collet of the **Model B** replaces the rubber band to allow for minute adjustments of tension on the feelers. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FEEL Feelers only).

7-Pin Standard

Quick Reset

Quick Reset
No. TLP-7SB

Standard Size
I.D. - .312" (7.92mm)
O.D. - .375" (9.53mm)

Small Bore
I.D. - .300" (7.62mm)
O.D. - .365" (9.27mm)

The **Quick Reset** has a knurled handle for greater comfort and better feel during picking. It also uses the adjustable collet around the feelers. As the name implies, this pick offers a quick reset feature to reset the feelers to the home position. The easy-to-adjust tensioning collet, combined with the quick reset, make this pick one of the fastest available. The barrel has a special diameter that allows the pick to work on standard diameter locks, as well as the small bore size found on some bicycle locks. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FL-7SB Feelers only).

7-Pin Standard

Small Bore

Tubular locks present an excellent opportunity for another specialty in your business. Being able to pick these locks is the first step. Whether you choose a standard or specialty model HPC Tubular Pick, you can pick all 7 pins at once, saving you valuable time. That means greater profits for you.

Specialty Tubular Picks

7-Pin Offset

The **7-Pin Offset** is designed especially for offset pin tubular locks. As a measure of extra security, some locks utilize an offset pattern of spaces, the pins are positioned half a space off from the standard pattern. The feelers on this pick are positioned to match this offset pattern. Some locks use an 8-pin split-center pattern. The Offset Pick has the eighth feeler to also defeat these locks. The pick includes an adjustable collet to control the tension on the feelers. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FEEL Feelers only).

7-Pin Offset
No. TLP-LRB

Guard

Some vending machines are equipped with a dome-shaped shroud over the lock to guard it from vandalism and break-ins. These installations require a special tubular key with a long shank to access the lock through the shroud. The **Guard** Pick has a similar design to effectively defeat 7-pin locks with these guards. The pick has a knurled collet for adjusting the tension on the feelers and a reset lever to return the feelers to their home position. Comes with the Tubular Key & Pick Decoder (No. TKPD-1) and a genuine leather case (No. TLP-CASE). (No. TLP-FL-GUARD Feelers only).

Guard
No. TLP-GUARD

High Security

The **High Security** Tubular Pick can defeat the ultimate in tubular lock security; the pin-within-a-pin design that Underwriters Laboratory originally deemed pick-proof! In 2, 3, or 4 of the chambers on these locks there is a secondary pin that must also be moved to the shear line to open the lock. This pick has secondary feelers in all positions to defeat these locks. It has a collet to adjust the tension on the feelers, and decoding lines to read the code directly on the pick. Comes with a genuine leather case (No. COMP-CASE).

High Security
No. TLP-UL

High-Security
Pin within a Pin

I.D. - .326" (8.28mm)
O.D. - .402" (10.21mm)

7-Pin Mini Bore

The popularity of laptop computers has led to an increase in the use of special locking cables to secure the computers. This has led to an increase in locksmiths needing to pick the small tubular locks on those cables. Similar to other HPC Tubular Picks, the **7-Pin Mini Bore** Tubular Pick allows you to quickly manipulate all seven pins at one time and open the lock in seconds. Be prepared for students and coffee house surfers that lock down their laptop and misplace their keys. Comes with a genuine leather case (No. TLP-CASE). (No. TLP-FL-7MB Feelers only).

7-Pin Mini Bore
No. TLP-7MB

Mini-bore

I.D. - .216" (5.5mm)
O.D. - .275" (7.0mm)

"EASY TO USE"

"I use the HPC Econo Tubular Duplicut™ to cut dozens of tubular keys every month in my shop and van. It's problem-free and so easy to use, it cuts keys almost by itself."

Bill Smith, RL
Plymouth Safe and Lock

Econo Tubular Duplicut™
No. 747E

Duplicate standard 7-pin tubular keys from an original or an HPC Tubular Pick!

Another tool you'll LOVE!

EASY IN!

Like all HPC Tubular Picks, the HPC Quick Reset picks all pins at the same time, getting you onto your next job quicker. It has an easy-to-adjust tensioning collet, combined with the quick reset feature making it one of the fastest picks available. The barrel has a special diameter that allows the pick to work on standard (.375") and small bore (.365") tubular locks. You'll like how easy it is to use and love how much money you'll make using it!

Lever Handle Remover

Lever Handle Remover No. LHR-100

- No. LHR-LSCREW
Large Pin Depression Screw
- No. LHR-SSCREW
Small Pin Depression Screw
- No. LHR-HBOLT
Holding Bolts (set of 2)

HPC's **Lever Handle Remover** is designed to **quickly remove locked lever handles for servicing**. It is ideal when picking the lock is not an option. Simply place the tool's specially designed hub over the lever. This allows you to easily manipulate a few bolts and screws to **remove the handle, without damaging the lock or handle**. Then you can open the door and service the lock. Constructed of industrial-grade plastic, it will not scratch the handle. **Simple to use with amazing results!**

Key-in-Knob Remover

Key-in-Knob Remover No. KIKR-100

- No. LHR-LSCREW
Large Pin Depression Screw
- No. LHR-SSCREW
Small Pin Depression Screw

Occasionally locksmiths need to service a locked door that they cannot pick open. Based on the HPC Lever Handle Remover, the **Key-in-Knob Remover** **removes ball, tulip and standard style knobs for servicing without damaging the lockset!** Perfect when picking is not an option! A must-have tool for all security professionals.

Cylinder Eater™

NEW

#1

High-security cylinders offer your customers the security they need. However, they can present a problem in a lock-out situation. Picking these locks can be too time-consuming. Drilling is often the best and only solution.

The **Cylinder Eater™** is a revolutionary drill attachment that will **chew up every cylinder you put in front of it!** With its replaceable tips you will instantly devour camlocks, knoblocks, deadbolts, IC and more, gnawing through shear lines with foolproof accuracy. The optional carbide bit gobbles up high-security cylinders as well. Throw away all of your cylinder jigs and open everything with just one tool! The HPC Cylinder Eater™ is unlike anything else on the market. It is a must-have for every security specialist who must bypass locked cylinders.

Lock Defeaters

Safe Deposit Box Nose Puller Set

**Safe Deposit Box
Nose Puller**
No. NP-4B

This heavy wrought iron and bar steel **Safe Deposit Box Nose Puller Set** is expertly machined and finished to effectively pull out a lock core from a safe deposit door. Simply turn the screw into the center of the core's keyway to act as an anchor. Then slip the spacer block into place and tighten by turning the knurled knob. Continue turning clockwise, slowly and gradually until the entire core is drawn out. Then use the guard key and disengage the bolt. If the door does not open, then it becomes necessary to use the Door Puller device (No. DP-7B). The Nose Puller can also be used for removing the plug from a padlock. It comes packed in a sturdy case.

Safe Deposit Box Door and Nose Puller Set

**Safe Deposit Box
Door and Nose Puller**
No. DP-7B
*Includes Nose Puller Set
(No. NP-4B)*

If the lock core has been pulled and use of the guard key has not opened the door, then it is time to apply the **Safe Deposit Box Door and Nose Puller Set**. Place the stepped spacer lock onto the hook unit. The 3 different diametered steps of .345" (2.15cm), .562" (1.43cm) and .680" (1.73cm) make it adaptable to 3 different sizes of plug holes. Place the correct diameter step into the hole. Have the hook end set against the inside back wall of the door, then tighten the knurled nut to hold the hook in place. The flat surface on the outside of the hook unit should be in a level position. The long flat blade is then fitted onto the holding slot, along with the remainder of the puller unit, as shown. Position the feet away from the centers of adjacent doors to minimize the possibility of distortion. The knurled knob is then turned until the door is pulled out.

Tubular Lock Saws

No. AG-1
*Standard Sized Tool and Extra
Saw for .375" (9.53mm) dia.*

No. AG-2
*Oversized Tool and Extra
Saw for .394" (10mm) dia.*

If picking is not possible, lock-outs of tubular locks can still be serviced. HPC's **Tubular Lock Saws** destroy the pins at the shear line. Hole saws are available for standard and oversized keyways. Saws will fit any 1/4" (6.35mm) electric drill. Saw life is approximately 3 openings. They are not for use on locks with hardened pins or ball bearings in the keyway.

No. G-1
Saw Only for No. AG-1
No. G-2
Saw Only for No. AG-2

F Series Manipulation Kit

When the design of the F Series cylinder was changed, it became more difficult to pick these locks. The **F Series Manipulation Kit** allows you to **defeat these locksets with ease**. Manipulate F Series leversets through the opening in the back of the handle. The unique punch tool allows you to punch a small hole in the neck of the knob for **quick access** to the spindle, regardless of the handing of the door. Unlock F Series knobsets and leversets quickly and easily, especially **around door jambs where other tools just can't!**

F Series Manipulation Kit

No. FSR-100

Complete kit including No. FSR-T100 and No. FSR-P100

No. FSR-T100

Manipulation tool for knobs and levers

No. FSR-P100

Knob punch for tight door jambs

TOOLS

Cylinder Drill Jigs

Some cylinders are impossible to pick. Even the best locksmith may be foiled by a broken cylinder spring, corroded pins, etc. In these cases, drilling is the answer. HPC's **Flat Face Drill Jig** and **Tulip Style Drill Jig** assure perfect alignment for drilling on the shear line.

No. CDJ-1

Cylinder Drill Jig and Drill Bit for Flat Face Cylinder

No. CDJ-2

Cylinder Drill Jig and Drill Bit for Recessed Tulip Design Knobs

No. CDJ-3

Cylinder Drill Jig, Drill Bit, 2 Key Blades and an Allen Wrench for Removable Core Cylinders

CDJ-2 for Recessed Tulip Design Knobs

CDJ-1 for Flat Face Cylinders

CDJ-3 for Removable Core Cylinders

The **IC Cylinder Drill Jig** is for Interchangeable Core Systems. It includes drill holes and key blades for drilling the control lug or the shear line. By drilling the retaining pin, the entire core can be removed and the control key biting can be determined.

Rekeying Tools

Illuminated Pin Station

Illuminated Pin Station
No. IPIN-99
Complete Kit

No. IF-395
.395" (10mm)

No. IF-495
.495" (12.6mm)

No. IF-550
.550" (14mm)

The **Illuminated Pin Station** is a **multi-function cylinder pinning aid**. On one side is a multi-size plug holder. The holes are sized to hold these popular plug sizes: .395" (10mm), .495" (12.6mm), .500" (12.7mm) and .550" (14mm). There are 2 different holes for .500" plugs to accommodate the variances found in some locks. On the other side is a holder for followers. This holding fixture frees up your hands. The Pin Station includes 3 unique followers made of a **bright translucent plastic that illuminates the interior of the cylinder housing**. These followers are **Green**, .395" (10mm) dia., **Red**, .495" (12.6mm) dia. and **Clear**, .550" (14mm) dia. and are also available separately. In the center of the work station is an angled mirror that reflects the ambient light in the room into the followers, providing exceptional light in the inside of the cylinder, which makes loading pins faster and easier.

Scan for more info!

Solid Plug Holder

Solid Plug Holder
No. CPH-10

The **Solid Plug Holder** is made of hardened bar stock and **holds .500-inch (12.7 mm) plugs** including: Arrow, Corbin, Kwikset, Lockwood, Sargent, Schlage, Weiser and Yale.

Multi-Sized Plug Holders

Vise-Held Plug Holder
No. CPH-5

Bench-Held Plug Holder
No. CPH-9

Adjustable Plug Holder

Adjustable Plug Holder
No. SUT-600

The **Adjustable Plug Holder** is a **universal plug vise**. The hole size is adjustable from .350" (8.89mm) to .600" (15.24mm) to give a perfect fit on many different cores. The plug vise body and slide are hardened and have a black oxide finish.

The **Multi-Sized Plug Holders** are real space and time savers. Both bodies are hardened and have a black oxide finish. The No. CPH-5 plug holder is **held in a vise**, while the No. CPH-9 conveniently **mounts on your work bench**. The holes are sized to hold these popular plug sizes: .395" (10mm), .495" (12.6mm), .500" (12.7mm) and .550" (14mm). There are 2 different holes for .500" plugs to accommodate the variances found in some locks.

Hollow Brass Follower Set

This **Hollow Brass Follower Set** contains 3 popular sizes of hollow brass followers. Use these followers on a variety of locks including the Corbin Russwin heavy-duty knob lock cylinder units. The small diameter follower is useful for cabinet locks, peanut sized cylinders and pin tumbler letterbox locks. This compact kit is efficient and lightweight. **All three followers fit inside each other for convenient storage** and the complete set slips into a tube secured by caps on both ends.

No. SUT-14-A .550" (14mm) dia. **No. SUT-14-B** .495" (12.6mm) dia. **No. SUT-14-C** .395" (10mm) dia.

Hollow Brass Follower Set

No. SUT-14
Set of 3 plus
Storage Tube

Plug Follower Set

These 4 **Plug Followers** will **fit virtually all of the rim or mortise cylinders** currently in use. They are made of centerless ground bar stock. Set includes all 4 sizes.

No. SUT-0 .395" (10mm) dia. **No. SUT-3** .500" (12.7mm) dia.
No. SUT-1 .495" (12.6mm) dia. **No. SUT-10** .550" (14mm) dia.

Plug Follower Set

No. SUT-47

Adjustable Follower

This **Adjustable Follower** is one follower that **does it all!** The spring action bar allows it to fit all standard locks from .495" (12.6mm) to .600" (15.2mm) in diameter.

Adjustable Follower

No. SUT-22

Storage Follower

The **Storage Follower** lets you **carry a mini rekeying kit wherever you go**. The end of this hollow .495" (12.6mm) follower unscrews to reveal a storage compartment perfect for shim stock, springs and more. Shim stock and springs are not included. Perfect for your glove box or toolbox and fits in your pocket!

Storage Follower

No. SF-495

Top Pin Loader

The **Top Pin Loader** makes loading top pins and springs easier than ever. One side is .495" (12.6mm) and the other is .550" (14mm). Just put the top pins and springs into the loader, slide it into the cylinder housing, push the pins in and twist the loader to secure them in place. **No rekeying station is complete without this tool!**

Top Pin Loader

No. TPIN-2

Rekeying Tools

Cylinder Cap Removal Tool

Cylinder Cap Removal Tool
No. SCRT-1

HPC's **Cylinder Cap Removal Tool** makes removing a cylinder cap from Schlage "A" line locksets a snap. Use it with the cylinder in or out of the knob. With the cylinder out, merely depress the cap pin and turn. With the cylinder in the knob, slide the tool over the tailpiece and depress the knob. Then, turn the tool slightly to depress the knob retainer. This tool saves time and tempers.

IC Tail Turner

IC Tail Turner
No. ICT-2

The **IC Tail Turner** is designed to fit standard (.500") and large format (.550") interchangeable core housings. **It grabs onto the two fingers of the tail piece and allows you to position them for easier core insertion.** This tool will speed up re-keying and eliminate a great deal of frustration.

Pin Tumbler Tweezers with Pin Pushing Attachment

Pin Tumbler Tweezers with Pushing Attachment
No. TPT-5
6" (15.25cm) long

The **Pin Tumbler Tweezers with Pin Pushing Attachment** makes it easier to load top pins into a cylinder. While a top pin is held in place, use your forefinger to push the attachment down to set the pin into the chamber. The pin loading wire is easily removable, making this ideal for loading bottom pins as well.

Compact Pin Tumbler Tweezers

Compact Pin Tumbler Tweezers
No. PTT-5
4" (10 cm) long

The **Compact Pin Tumbler Tweezers** are only 4" (10 cm) long, allowing you to **get closer to the action.** The specially milled tips grip top and bottom pins firmly. These compact tweezers are the perfect pocket-sized pinning aid.

Pin Tumbler Tweezers

Pin Tumbler Tweezers
No. PTT-4
6" (15.25cm) long

The groove in the tip of the **Pin Tumbler Tweezers** provides a **firm, non-twisting grip on cylinder pins** for easy loading. The tip also is milled back so that the outside diameter of a standard .115" (2.92mm) pin extends past the tip. This permits the pin to butt up against the end of the plug follower when loading the upper chambers, providing added control when holding top or master pins of varying length.

Installation & Service Tools

Also known as snap rings, retaining rings or circlips, Truarc Rings are found on lock cylinders and other mechanical assemblies and are available in two types: **Internal and external**. To remove or install these rings you need a **compressing tool** to reduce the diameter of internal rings and a **spreading tool** to enlarge the diameter of external rings. Whether the ring is internal or external, the size of the ring will vary depending on the application. The **best pliers will accommodate both internal and external rings** in a wide variety of sizes and will have multiple tips for various hole diameters.

Convertible Truarc Ring Pliers

1

With a simple slide of a switch, the **Convertible Truarc Ring Pliers** quickly and easily convert from ring compressor (for internal rings) to ring spreader (for external rings). These pliers feature **comfort grip handles and an adjustable stop that limits the jaw opening for both external and internal operation**. They can be used on internal rings in sizes of .25 to 1-inch (6.5 to 26 mm); and on external rings in sizes of .125 to 1-inch (3 to 26 mm).

They come with **5 pairs of interchangeable tips** in 3 different sizes, including 2 90°-angle sets for use when clearance to the ring is limited, all packed in a plastic carrying case

Dual Truarc Ring Pliers

1

A two-pivot center in the **Dual Truarc Ring Pliers** allows for dual operation; The No. 1 center is for compressing internal rings. The No. 2 center is for spreading external rings. **Changeovers are made quickly and easily**, just turn the knob and shift the handles.

Tip Size: .038" (1mm)

Dual Truarc Ring Pliers
No. TRU-55

Ring Spreader

The **Ring Spreader** is an economical, single-operation pliers for use on external rings.

Tip Size: .038" (1mm)

Ring Spreader
No. TRU-122

Truarc Ring Assortment

This **Truarc Ring Assortment** contains **260 rings** and retainers in **27 different styles and sizes**. The rings are very helpful for servicing Arrow, Best, Corbin, Dexter, Ilco, Lockwood, National, Schlage and many more. They are made of carbon spring steel and offer long lasting tension or compression for retaining purposes.

Truarc Ring Assortment
No. TRU-275

Installation & Service Tools

Sturdy Strike Marker

Sturdy Strike Marker
No. SSM-36

The **Sturdy Strike Marker** easily marks the strike location on wood and steel jambs. It features durable solid steel construction with replaceable hardened steel tips. Wooden strike locators do not last. This tool makes it easy to accurately mark the strike location on a door jamb and will not split or crack when needed most.

No. SSM-36T

Package of (3) Steel Tips

Easy Backset Marker

Easy Backset Marker
No. EBM-234

The **Easy Backset Marker** marks the backset location for 2-3/4" and 2-3/8" backset, and bolt location for 1-3/4" thick doors. It includes edge boremarks and is quick and easy to use! Installing locksets and deadbolts is an everyday occurrence. This tool makes it easy to accurately mark the backset on the door when a jig is not available.

Use these V grooves
for the edge bore.

Use these V grooves
for the cross bore.

Router Drill

Router Drill
No. RD-1

The **Router Drill** saws, drills, routs and files. It fits any electric drill or drill press. **It cuts its own starting hole in any shape or direction that the tool is moved.** It has sharp milled flutes for fast cutting action that will not clog. Ideal for enlarging holes and making scrolls. It cuts wood, plastics and nonferrous metals and is made of hardened steel for a long life.

Cylinder Shims

Cylinder Shims
No. SCS-25

If you need to re-pin a cylinder and you do not have the key, **shimming it open is an easy, effective solution.** HPC's stainless steel **Cylinder Shims** are strong and firm. They are packed 25 pieces per bag.

Mortise Cylinder Lock Tap & Die Set

When mortise cylinders and lock cases are new they screw together without a problem. Often times a mortise cylinder is forced out of a lock without loosening the retaining screw. Other times an inexperienced person will force a mortise cylinder into a lock crooked. These actions result in stripping the threads of the cylinder or the lock case itself. The HPC **Mortise Cylinder Lock Tap & Die Set** was designed to repair this type of damage. **The Tap can be easily twisted into a stripped lock case** cutting new usable threads into an otherwise ruined lock. The Holding Fixture **secures a stripped mortise cylinder in your vise** while you use the die to repair the threads. The tap and die are also available separately.

Mortise Cylinder Lock Tap & Die Set

No. CLTD-5

Complete Re-Tapping Kit with Cylinder Holding Fixture and Metal Box

Double "D" Metal Punch & Die Set

HPC's **Double "D" Metal Punch & Die Set** punches a double "D" hole. It is a necessary tool for locksmiths installing cam locks on metal cabinets, desks, sheet metal lockers, filing cabinets and cash boxes made of single wall, sheet metal of 18-gauge or lighter. This tool punches a .645" x .770" (16.4 x 19.5mm) hole in 18-gauge (.048"/1.2mm) mild steel.

Spring Steel Assortment

Spring Steel Assortment
No. FRS-4

This **Spring Steel Assortment** contains over **50 pieces of different sizes of the most popular flat and round spring steel**. The assortment is cut into convenient 9" (23cm) lengths and is packaged in a see-through round plastic container. Approximate weight: .5 lb. (225g.)

Graphite Gun

Graphite Gun
No. HGG

HPC's **Graphite Gun** is so unique that it earned a **U.S. Patent!** It sprays in any direction. Use HPC's Graphite Gun prior to picking to loosen tight wafers or pins. **Graphite is also an excellent lubricant for machines.** The Graphite Gun contains approximately 1/3 oz. (8.5g) of natural flake graphite and is refillable with HPC's Bulk Graphite (No. GG-16).

- Refillable
- Real rubber
- Spill-Proof
- Leak-Proof
- Clog-Proof

Bulk Graphite

Bulk Graphite
No. GG-16

HPC's **Bulk Graphite** is **pure natural flake graphite**. The GG-16 contains 1 lb. (.45kg) of high quality micro-spray graphite in a re-closable plastic bottle. It provides an **economical and ecological way to refill your Graphite Guns**.

Magna Scope

Magna Scope
No. MGS-1

The **Magna Scope** is an economically priced otoscope. It is ideal for magnifying and illuminating hard to see areas. **This compact, precise instrument reflects the same level of craftsmanship and precision as many of the most expensive medical instruments in today's market.** It comes with 8 specula, including 2 long and 2 short each with the pin depressor assembly. Requires 2 AA batteries.

No. MGS-PD
Pin Depressor Set
1 long and 1 short

No. MGS-B2
Bulb Only

Impressioning Tools

Clean Grip Impressioning Tool

HPC's **Clean Grip Impressioning Tool** holds onto the center of the key blank, not by the face. This **eliminates the possibility of scratching the face** of the key blank, while providing a firm hold. It has a **unique locking mechanism** with a retaining pin that ensures a tight grip on the key blank. The cushioned handle is comfortable and easy to hold. This tool will **hold a variety of key blanks** and has been designed to be simple, quick and dependable. With the key blank locked in place, you are ready to impression with confidence.

Clean Grip Impressioning Tool No. CGIT-10

Basic Impressioning

Every locksmith should have an arsenal of methods to gain entry through locked doors. One viable technique is impressioning; creating a new key by reading pin marks on a key. The **Basic Impressioning Manual** explains the essential theories and methods for making a key by impressioning. The proper technique for blank preparation, obtaining marks and the ability to recognize marks are covered in detail.

Basic Impressioning No. LC-5

Decoders

Ultimate Micrometer

1

**Ultimate Micrometer
No. SKM-2D**

The **Ultimate Micrometer** allows for **precise measuring of depths of cuts**. The easy to see digital display gives accurate readings in thousandths of an inch, without eye strain. The heavy-duty construction will provide years of service. The satin chrome plated micrometer comes with a genuine leather case with a snap closure. (No. COMP-CASE Case only).

Place key in micrometer...

Gently tighten...

Precise measurement every time!

Straight Yoke Micrometer

**Straight Yoke Micrometer
No. SKM-1**

The **Straight Yoke Micrometer** has a ratchet thimble to assure proper tightening for an **accurate reading in thousandths of an inch**. It has a satin chrome body and yoke and also includes a genuine leather case with a snap closure. (No. COMP-CASE Case only).

Tubular Key and Pick Decoder

**Tubular Key
& Pick Decoder
No. TKPD-1**

The **Tubular Key & Pick Decoder** is a stainless steel measuring device for **decoding tubular keys and picks**. It decodes eight depths; for standard, small, large, left hand, right hand and UL (pin-within-a-pin) tubular keys.

Pocket Sized Key Decoder Kit

The **Pocket Sized Key Decoder Kit** is so **innovative** that its concept earned it multiple **U.S. Patents**. It determines the original factory depths of most popular commercial, residential and automotive keys. Simply insert the correct information card into the top slot of the decoder. Lowering the depth pin into each cut, from bow to tip, will indicate the correct depths in the window at the top. The pivoting depth pin allows for **easy decoding** of Medeco® angles. Each of the 2" x 4" (5 x 10cm) information cards also lists the manufacturers' depth and space specifications. The kit comes **complete with a handy carrying case, 3 shims and 111 information cards**.

Stamping Tools

Stamp Aligner™

U.S. Patent No. 5,305,531

Unique Concept
Earned it a U.S. Patent

Stamp Aligner™ No. SA-7

1/4" (6.35mm) square hole fits
1/8" (3mm) & 3/32" (2.5mm)
character stamps.

The patented **Stamp Aligner™** solves the problems locksmiths have always had while stamping numbers on keys. Crooked numbers, stamps flying across the room, and numbers that go up, down, and all around are now things of the past! The Stamp Aligner™ holds the stamps so that figures may be stamped on keys in a straight line with even spacing between characters. The Stamp Aligner™ has 7 detents to stamp up to 7 characters and 3 rows evenly on a standard key. It will even **accommodate large bow keys**. To use, a key is placed onto the bottom part of the Stamp Aligner™ and secured in place. The top part of the Stamp Aligner™ is moved into one of the spacing indexes. The stamp is placed into the square hole, over the spot where the key is to be stamped. The stamp is held securely in place for it to be struck by a hammer. Spacing is clearly defined by a spring-loaded detent built into the device. **Each character stamped on the key will be straight, spaced evenly and aligned perfectly.** When the stamps are all struck with the same force, the result is a key that looks like it was factory stamped. Letter and Figure Stamps are sold separately.

Stamp Sets

Figure sets include numbers "0" through "8". (Use the "6" upside-down for a "9".) Letter sets include "A" through "Z", plus an ampersand "&" and feature:

- **Tempered Head Prevents Mushrooming**
- **Extra Tough Shank Prevents Bending**
- **Hand Ground Taper Makes Positioning Easier**
- **Specially Hardened Character End Prevents Chipping**
- **Sharp Chisel Edge Character Face Assures Clear Impressions**
- **Plastic Organizational Box**

The stamps can be used alone or with the HPC Stamp Aligner™ Series for an even professional look.

Figures:

No. HCF-3/32

3/32" character with 1/4" shank
(2.5mm character with 6.35mm shank)

No. HCF-1/8

1/8" character with 1/4" shank
(3.0mm character with 6.35mm shank)

Letters:

No. HCL-3/32

MASTER

HPC's **Specialty Locksmith Stamps** allow you to **permanently mark master or restricted keys**. Let other locksmiths and key duplicators know it is a special purpose key and is part of a restricted system. The stamps are made of heavy-duty steel stock, and measure .375" x .625" (9.5 x 16mm), **hardened and zinc plated** for years of clear stamping.

Characters are approximately 0.1- inch (2.5mm)

Stamp Aligner™ XL

The **Stamp Aligner™ XL** comes with the Universal Stamping Plate to lock keys in place. The main body also will hold rim or mortise cylinders for stamping. Often after a key is cut, an identifying number is stamped on it. This can lead to stamping crooked numbers, stamps flying across the room and a key that did not reflect professionalism. With the Stamp Aligner™ XL, **two keys can be held securely** on the Universal Stamping Plate while the stamps are held in place by the Index Block. The result being **evenly spaced, perfectly aligned characters** on the key.

The Universal Stamping Plate is easily removed, revealing two openings designed to hold rim and mortise cylinders so that they can be stamped as well. **Specialty plates are available for quick “snap-in” locking of standard Schlage keys and Best IC keys and cores for even faster stamping.** Whether stamping a name on one key or stamping codes on multiple keys and cylinders in a master key system, the **Stamp Aligner™ XL creates a professional looking stamped key** and will become an essential component for your locksmith shop.

The **Stamp Aligner™ XL (Best IC)** comes with the Universal Stamping Plate and a special Best IC Stamping Plate. This plate is designed for quick “snap-in” locking of standard Best keys plus provides a place to hold Interchangeable cores for stamping.

The **Stamp Aligner™ XL (Schlage)** comes with the Universal Stamping Plate and a special Schlage Stamping Plate that is designed for quick “snap-in” locking of standard Schlage keys.

With stamping plate removed the Stamp Aligner™ XL will hold rim or mortise cylinders for stamping.

Automotive Tools

Steering Column Lock Plate Compression Kit

1

Steering Column Lock Plate Compression Kit
No. SWLPC-1
Complete Kit

The **Steering Column Lock Plate Compression Kit** is a **complete kit for new style air bag columns**, as well as older models. It includes both standard and metric threaded shafts and set screws, along with a longer, narrower U-bracket for air bag and telescoping columns.

The kit includes the metric internally threaded shaft and set screws that are required for present day back to 1978 on General Motors vehicles. It also comes with a handy 9" x 12" (23 x 31cm) vinyl pouch. Once the steering wheel is removed, simply screw the center post onto the steering shaft and place the yoke over it. Turning inward on the center post nut compresses the plate.

This leaves both hands free to pry the wire snap-ring out of the shaft's groove.

Re-installation of the ring after servicing is accomplished by just sliding the ring down the tapered shank of the center post screw and back into the groove.

No. SWPLC-1SSM
Metric Set Screw Only

No. SWPLC-1SSS
Standard Set Screw Only

Lock Plate Compressor

Lock Plate Compressor
No. SWLPC-2

A specially designed **Lock Plate Compressor** for tilt telescopic columns used on General Motors up to 1998. After the steering wheel has been taken off, access to the ignition cylinder retainer requires the removal of the lock plate. The lock plate is retained with heavy spring pressure by a clip, as shown. This tool is designed to compress the plate for removal and reinstallation of the holding clip.

Gateway™ Tools

Gateway™ Tools
No. GTO

The **Gateway™ Tools** are revolutionary tools that act as a **third hand to hold open the dust cover on auto door locks**.

This allows you to have both hands free to pick the lock or extract a broken key. Just insert into the door lock, turn in the direction the shutter opens and the lock is ready for service (with the gateway securely held out of the way). The universal slot size covers all of the major U.S. manufacturers (GM, Ford and Chrysler), as well as many imports (BMW, Volkswagen, Toyota, etc.). Set of 2 pieces

5' Flexi Magnet Stick

The HPC **5' Flexi Magnet Stick** is a flexible tool that will wiggle and worm its way into the smallest of areas and attract your misplaced parts with its mighty double-sided magnetic force. At 5 feet (1.5m) long, you will be able to reach the small tools and parts that you thought were lost forever. One side has a small magnet to fit into 8mm openings and the other side has a slightly larger magnet that easily lifts 2 lbs (1kg) and can pull up to 10 lbs (4.5kg).

5' Flexi Magnet Stick
No. MAG-200

Clip & Crank Removal Tool

The **Clip & Crank Removal Tool** easily removes the hard to reach retaining clips without damage. These clips can be found on GM, Ford, Chrysler and various other vehicles.

Clip & Crank Removal Tool
No. AST-3

Clip Removal Tool

The **Clip Removal Tool** is designed to remove door panels without damage. Gaining access to the automobile door lock cylinder requires removal of the door trim pads. Removal without tearing out the nylon retainer clips has always been difficult. The tapered end of this heavy-duty lever-type tool enters between the door and trim pad, gently removing the pad. This greatly reduces the possibility of tearing or damaging the pad and clips.

Clip Removal Tool
No. AST-4

Auto Lock Cap Pliers

The **Auto Lock Cap Pliers** remove auto lock face caps easily in seconds! The specially machined tips grip like a vise. These pliers quickly remove both the factory lock cap using the rolled crimp and the "Tab Style" replacement caps. When used with care, auto caps can be removed with a minimum of distortion, allowing re-use of the removed cap.

Auto Lock Cap Pliers
No. ALCP-10

Safe Change Keys

Premium Quality Multi-Use Drill Bits

These **Premium Quality Multi-Use Safe Drill Bits** have a **tungsten carbide tip**. They are designed for multiple uses on steel hardened to Rockwell C-60, and they can be re-sharpened if they get dull. The point of the bits has a negative rake angle that prevents chipping and helps to disperse the heat from the cutting edge.

No. SHPD-12

1/4" (6.35mm) dia., 8" (20cm) long
with a tungsten carbide tip

No. SHPD-14

3/8" (9.5mm) dia., 8" (20cm) long
with a tungsten carbide tip

Safe Opening Tool Kit

The **HPC Safe Opening Tool Kit** is a collection of six tools designed for use on safe locks after burglary has been attempted. By entering through the existing spindle hole, the ends of the tools flip open and allow you to work from the inside of the lock. These tools are specifically designed to recreate correct combination input by allowing you to deactivate relocking mechanisms and draw back bolts. **The ends of the tools are like little fingers and are designed to manipulate the inner workings of many safe locks.** With the HPC Safe Opening Tool Kit you can quickly and easily open LaGard 1800 and 2100, Mosler 302 and 402 and many S&G safe locks. This kit comes complete with 6 tools and instructions in a handy roll-up case for convenient storage.

Safe Opening Tool Kit

No. NST-6

For reference data on safes and changing combinations, read the HPC Safe and Vault Manual (No. SVM) and the HPC Safe Combination Changing Manual (No. SCC), part of HPC's library of locksmith manuals in the Software & Books Section.

"The HPC Lock Tap & Die Set is a wonderful tool! We have a lot of mortise cylinders, both old and new, and it allows us to repair them quickly. We have a set in each shop!"

Single-Tag KeKab® Series

HPC's Single-Tag KeKab® Key Cabinets provide storage for 8 to 730 keys.

The smaller sizes are perfect for homes, apartments and small businesses. The larger sizes have sufficient capacity for universities, hospitals and large office towers. The cabinets come complete with numbered key tags, key control tags and hardware for wall mounting.

Key Tags

The key tags are made of white plastic and are numbered for easy identification. The bright nickel-plated snap hooks can hold multiple keys.

Heavy-Gauge Steel

All cabinets are constructed of heavy-gauge steel, with piano-hinged doors to provide a sturdy location to secure your keys.

Scan for more info!

Durable Finish

All cabinets are painted with a unique powder coat process that provides an attractive and durable finish. The neutral sand color fits in any location.

Steel Key Racks

Racks are slotted to store key tags uniformly for immediate identification.

Lock Location Record

Keep track of which door each key opens.

Key Control Out Tags

These Out Tags are used to record when a key is removed from the cabinet, who has the key and when it is due back. They are printed on yellow card stock.

KeyTrail® 25

Keep track of the keys, the people that hold them and the doors they open with the free sample of KeyTrail® included with each cabinet.

Locking Options

There are many locking options available, including master-keyed, dual-control, keyed-alike, electronic digital lock, 4-wheel combination lock and using your own mortise cylinder. Most cabinets are secured with a 5-wafer, key-retaining cam lock. The 260X-, 500- and 730-key cabinets use a 7-pin tubular T-handle lock.

Specialty Locking KeKabs

4-Wheel Combo KeKab®

4-Wheel Combo KeKab®
No. KEKAB-4W65

The **4-Wheel Combo KeKab®** offers an **economical keyless locking option** for organizing keys. The 4-wheel lock combination has **10,000 available combinations** and a key override, included. The mechanical lock comes with a decoding pin and the combination can be easily changed when necessary. Just like the rest of HPC's KeKab® line, the cabinet is made of heavy-gauge steel and finished with powder textured paint in neutral sand color. The 4-Wheel Combo KeKab® holds 65 keys and comes complete with numbered tags, out tags and control chart.

Capacity	Dimensions	Shipping Weight	Lock	Stock No.

Horizontal & Vertical KeKab® Series

Vertical KeKab®
No. KEKAB-V50

The Horizontal & Vertical KeKabs are designed for mounting in hard to fit places.

The **Vertical KeKab®** is perfect for narrow areas such as between a doorway and corner. The **Horizontal KeKab®** is perfect for areas such as above or beneath a window. Just like the rest of HPC's KeKab® line, both of these KeKabs are made of heavy-gauge steel and finished with powder textured paint in a neutral sand color. They are equipped with a 5-wafer cam lock and come complete with numbered key tags, out tags and control chart.

Horizontal KeKab®
No. KEKAB-H48

All HPC KeKabs come with a free download of **KeyTrail® 25**, a full function sample version of the preeminent program for managing your keys, the doors that they open and the people that hold them.

Keyable KeKab®

HPC's **Keyable KeKab®** series eliminates the problem of how to control the key to the key cabinet.

This HPC exclusive line of cabinets allows you to add your own mortise cylinder and key it into existing master key systems or key it to the same bitting as another door.

Add a high-security cylinder for extra protection of the keys. The Keyable KeKabs are equipped with a heavy-duty back plate and cam. They are designed to **use standard 1" mortise cylinders**. Longer cylinders can be accommodated by using spacer rings. The mortise cylinder, keys and spacer rings are not supplied with this cabinet. Add convenience and security to the storage of your keys with HPC's Keyable KeKabs. Numbered key tags, out tags and control chart are included.

Capacity	Dimensions	Shipping Weight	Lock	Stock No.
65 keys	17" x 13" x 3.25"	10 lbs	accepts	KEKAB-KK65

The "X" at the end of a KEKAB stock number denotes that the cabinet is expandable.

Keyable KeKab®
No. KEKAB-KK65

Digital KeKab®

HPC's **Digital KeKab®** series utilizes an electronic lock to provide a unique combination of convenience and security.

The Digital Lock has many intelligent features. **There are 4 levels of access including the Master Code, Sub-Master Code, User Code and Technician Code.**

The Security Lockout feature disables the lock for 10 seconds after 3 incorrect codes are entered.

No wiring or central processors are required. The Digital Lock is operated by two AAA-batteries; **fresh batteries will power 15,000 openings**. A low-battery indicator warns when batteries are low and special jumper ports allow access of external power in the event of battery failure.

Numbered key tags, out tags and control chart are included. With its all-metal construction, your HPC Digital KeKab® is built to last.

55 to 90 keys	13.38" x 15.06"	SLK-35
	34 x 38cm	

**SlimKab™
No. SK-35**

The **SlimKab™** Series of key control cabinets utilizes **hooks to accommodate standard key rings**. The cabinets are offered in capacities of 20 to 90 keys, including 2 expandable sizes. The heavy-gauge steel construction and 5-wafer cam lock keep the keys secure. The SlimKabs are painted in a neutral sand color and come with key tags.

Peg Board KeKab®

The **Peg Board KeKab®** is designed to secure your supply of key blanks. If you use restricted or controlled key blanks or expensive transponder blanks protect your investment by keeping them secure in this cabinet. It is supplied with 24 hooks to accommodate a wide assortment of blanks. The use of peg board on the interior wall allows you to arrange the hooks to fit your requirements. The custom-designed hooks also will prevent the keys from falling off when the cabinet is installed in your mobile shop. The Peg Board KeKab® is made of heavy-gauge steel with a textured powder coat finish and is secured by a 5-wafer cam lock.

Add Key Blank Inventory Tags
(No. INV-1) to help manage
your inventory.

Two-Tag KeKab® Series

HPC's Two-Tag KeKab® Key Cabinets provide storage for 30 to 500 keys. The hooks in these cabinets hold two tags. The red tag is for the "permanent" key and is designed to remain in the cabinet (except for when used in an emergency or to make a new duplicate). The white tag is for the "loaner" key and is used when issuing keys. The smaller sizes are perfect for apartments and small businesses. The larger sizes have sufficient capacity for universities, hospitals and large office towers. The cabinets come complete with both permanent and loaner numbered key tags, key control tags, cross-reference key control binder and hardware for wall mounting.

1

Permanent Tags

The red plastic tags are sequentially numbered for easy identification. The tags have an integral self-locking key holder to securely fasten the tag to a key.

Loaner Tags

The white plastic tags are sequentially numbered for easy identification. The tags have an integral self-locking key holder to securely fasten the tag to a key.

Key Control Out Tags

The paper Out Tags keep a record of loaned keys. Metal tag holders are included to reinforce the tags when hanging in the cabinet.

Cross-Reference Binder

This 3-ring binder contains multiple listings including the keys, the locations and the personnel that hold the keys, providing complete key control at the facility.

Locking Options

The lock options available include master-keyed, dual control and keyed-alike.

Key Collection Bags

The pre-printed plastic bags are used when keys are returned. There is sufficient room to record the tag number, personnel ID number and other pertinent information.

Heavy-Gauge Steel

All cabinets are constructed of heavy-gauge steel with piano-hinged doors to provide a sturdy location to secure your keys.

KeyTrail® 25

Keep track of the keys, the people that hold them and the doors they open with the free sample of KeyTrail® included with each cabinet.

Durable Finish

All cabinets are painted with a unique powder coat process in a neutral sand color that provides an attractive and durable finish.

Wall Safes

SPACE
SAVER

HPC's **Wall Safes** come in two sizes and are constructed of heavy-gauge steel. All locking and hinge points are **dual reinforced steel**. The safes are sized to **easily install between the wall studs**, and feature a true flush face allowing a mirror or picture to be hung in front of the safe concealing it from view. They are finished with a **unique texture powder coat painting process** in an attractive neutral sand color. The safes are offered with three different locking options: tubular lock, combination lock and one that allows you to add your own mortise cylinder. The combination lock is a 3-wheel, resettable lock allowing over 750,000 possible combinations. These Keyable Wall Safes offer a unique combination of **security and convenience**. They make it possible to include the safe in a master key system, add a high security cylinder, and/or key it to an existing door.

Specialty Storage

Medi-Kab™

HPC's **Medi-Kab™** offers a **secure location for medicine and pharmaceuticals**. The welded, heavy-gauge steel construction, rugged piano hinged door, and 5-wafer cam lock assures the contents of the cabinet will remain protected. They are **available in 2 sizes to fit most applications**. Medi-Kabs are stocked keyed-randomly and they **can be master-keyed, keyed-alike or keyed-differently** to meet virtually any requirement. When higher levels of security are needed, **dual-control locks are available**. The powder coat textured painting process is in a neutral sand color finish that is suitable for any décor in a home, office, store, or factory.

Security Locking Bars for File Cabinets

Many file cabinets come without locks, and those with locks can be easily compromised. **Security Locking Bars** from HPC add a substantial level of security to steel or wood cabinets. They are designed for **use on 4- or 5-drawer file cabinets**, and can also be used on cabinets for blue prints, tools, as well as other applications. The Security Locking Bars **include all necessary hardware for easy on-site installation**. They are made of heavy-duty 0.5" x 1.5" (1.25 x 3.75cm) channel steel, finished in a neutral sand color. The hole in the hasp is 5/16" (7.95mm). A padlock is required.

Emergency Key Box
No. 511

Every time you install a double-sided deadbolt cylinder you have an opportunity to sell an **Emergency Key Box** from HPC. Double-sided locks offer extra security for restricted areas. However, they can potentially cause life safety issues. Installing an HPC Emergency Key Box at these locations is **the perfect solution when personnel need to enter or exit through these doors in an emergency**. The bright red steel box has a key-locking hinged door with a plexiglas window. When an emergency arises and access to the key is necessary, **break the plexiglas with the attached hammer**. The Emergency Key Boxes **come with a 5-wafer cam lock, keyed-randomly** and they can be **keyed-alike** or **keyed-differently** to meet virtually any security requirement.

Fire Department Box
No. FDB-511

The **Fire Department Box** comes with **dark plexiglas to hide the contents**.

SECURITY FLANGE

Over Door Key Keeper™

#1

HPC's **Over Door Key Keeper™** is perfect for preventing lockouts from lost keys! It is large enough to secure several keys. The **box is placed over the top edge of the door**. When the door is closed, the top mounting screws are hidden. This unit also can be used in the home to **keep valuables in a discreet and secure place**. The Over Door Key Keeper™ is made from **heavy-gauge steel** with a piano-hinged door for durability. It is available with either an economical standard lock or a high security tubular lock, and has a charcoal gray baked enamel finish. Specify type of lock preferred.

(Keyed-Alike 303)

The Over Door Key Keeper™ can be hung on the inside top of a closet sliding door or turned upside down and screwed onto the underside of a bed's headboard giving your customer a secure hiding place for jewelry or cash.

Auto Key Keeper™

#1

HPC's **Auto Key Keeper™** will end lost keys at car dealers and parking garages. Simply lower the window, and slip the back clip over the top edge of the glass. **Closing the window secures the box**, and keys locked within, against all but extreme vandalism. The Auto Key Keeper™ is large enough to **accommodate long automotive keys and remotes**. A high-security 7-pin tubular lock with dust cover offers excellent pick resistance and protection against the elements. An economical 5-wafer cam lock, with dust cover is also available. These boxes are made of **heavy-gauge steel** with a charcoal gray baked enamel finish and a welded hinge to prevent knockout. Specify type of lock preferred.

Cylinder and Latch Guards

Cylinder Guards

The cylinder is one of the most vulnerable parts of a narrow stile aluminum door. Left unprotected, cylinders can be easily twisted or pulled out. The plugs on these cylinders can be pulled out, or the door stile can be drilled and the lock tripped open. The entire DorGuard™ series will foil an attack against all of these vulnerable points.

Latch/Bolt Guards

A must where complete security is desired. These effective barriers prevent any door openings by a knife, saw or celluloid strip. Many homes, hotels, motels and store fronts still have unguarded latches and bolts. They are easy prey to even an inexperienced burglar, and need the protection of a Latch/Bolt Guard.

Door Spreading

Narrow stile aluminum doors present another area of vulnerability to forcible entry. These unprotected doors are subject to a pry bar spreading the door from the jamb or separating a pair of doors. The DorGuard III™ solves this particular problem.

(27 x 182mm)

Heavy-Duty Guard Plate

This Heavy-Duty Guard Plate is the strongest and most popular guard plate.

It is 14" (35.5cm) long and is made from 2 pieces of cold rolled steel, welded

1 together with a metallic brown finish. This guard plate offers maximum resistance to prying and forcing. It mounts onto your door with 2 carriage bolts going through the door and is anchored with a nut and cap nut on the inside. The 4 wood screws go into the edge of the door. Guard plates come complete with all necessary hardware and illustrated instructions.

Heavy-Duty Guard Plate No. VDG-10

1.75"W x 14"H
(44 x 356mm)

Offset Guard Plates

Offset Guard Plates are used on vestibule doors with projecting door casings (for doors that are not flush with the frame). These plates are easily installed by drilling only 2 holes and using the pair of through bolts and nuts. The guards are made of cold rolled steel and have a satin stainless finish. The 14" (35.5cm) overall length extends 3" (7.6cm) beyond the average lock face, protecting against unauthorized, forcible entry. There are 4 sizes available. Guard plates come complete with all necessary hardware and illustrated instructions.

HPC/Scotsman Door Guards

HPC/Scotsman CylGard™

CylGard™
No. CG1-AXC-EA
 1.73" O.D. x 1.165" I.D.
 (44 x 30mm)
 Satin Stainless Finish

The HPC/Scotsman CylGard™ is a case hardened solid steel ring designed to guard against forcible entry. It spins freely around the cylinder, preventing the use of a wrench to break the cylinder. It has a satin stainless finish, providing an extremely durable and attractive look.

DorGard II™

DorGard II™
No. DG2-AXS-10

The DorGard II™ provides unsurpassed protection for lock cylinders on narrow stile aluminum doors. Using cast steel components, it creates a "vault" around the cylinder, virtually eliminating the possibility of unauthorized entry by removal of the cylinder or cylinder plug. The face plate is cast stainless steel, protecting against all common drilling equipment. The plug protector is made of case hardened steel. It rotates freely in the face plate, protecting against forcible removal of the plug. The DG2 is affixed with hardened steel bolts through the door. The unique construction provides easy installation and easy access (without removing the door guard) for servicing the cylinder. DorGard II™ can be used with any cylinders from 15/16" to 1-3/8" (2.38 to 3.50cm) in length. Satin stainless finish.

1.125" (28.6mm)
 Standard Cylinder
 Satin Stainless Finish

DorGard II™ has been specified in the blueprints for banks in Canada and has become very popular in the United States as well!

DorGard III™

A common problem with narrow stile aluminum doors is attack at the door jamb. An unprotected door is subject to a pry bar spreading the door and the jamb, or even ripping out the jamb, allowing unauthorized entry. Sawing the bolt has also been a means to gain unlawful entry. DorGard III™ will thwart all of these attempts, as well as guard the lock cylinder.

The DorGard III™ provides the same cylinder protection as the DorGard II™, plus it has the added benefit of a latch protection plate. This hardened steel plate becomes an integral part of the DorGard™ system. Cast in one piece, with ribs on the back for added strength, the latch plate has two pins that will rest in holes drilled into the door jamb.

This innovative pin feature adds another level of security to the door by linking the door and the jamb together.

The DorGard III™ is the perfect choice for electric strike applications; it adds security to the convenience of electric strikes. It completely conceals the area of the lock bolt and strike, and blocks all access to the lock and cylinder.

The DG3 can be used with any cylinders from 15/16" to 1-3/8" (2.38 to 3.50cm) in length. The DorGard III™ is non-handed so that it can be used on right or left handed doors. It comes in a durable, satin stainless finish. Mounting hardware and illustrated installation instructions are included. The TK3 installation kit is highly recommended for proper installation.

WHY CHOOSE HPC?

- **Premium Quality**
- **Precision Manufacturing**
- **Professional Grade**
- **Superior Performance**
- **Innovative Inventions**
- **Options for All Skills**
- **Time-Tested**
- **World-Renowned**
- **Location, Location, Location...**

**We are centrally located,
here in the
Land of Lincoln,
right next to
Chicago,
just blocks
from
O'Hare Airport.**

What is a QR Code?

Simply put, it stands for "Quick Response" Code. It is a mobile phone readable barcode that is a shortcut to guide you to all sorts of interesting and truly useful information.

To view a QR Code simply download one of the many FREE QR Reader apps available for all smart phones. Open the app, point your phone at the QR Code and let your phone guide you. Throughout our new catalog you will see many QR Codes. These codes will direct you to additional information, videos of the products in use, product demos and more! Our catalog is an incredibly comprehensive collection of the most up-to-date HPC product information available, yet where print media ends the QR code picks up. With QR Codes it's like having product videos and endless information embedded in the catalog.
